How Everything Works Louis A. Bloomfield,2007-08-28 By explaining the physics behind ordinary objects this book unravels the mysteries of how things work Using familiar examples from everyday life and modern technology this book explains the seemingly inexplicable phenomena we encounter all around us As it examines everything from roller coasters to radio musical instruments to makeup and knuckleballs to nuclear weapons How Everything Works provides the answers to such questions as why the sky is blue why metal is a problem in microwave ovens and why some clothes require dry cleaning With fascinating and fun real life examples that provide the answers to scores of questions How Everything Works is nothing short of a user s manual to our everyday world *The Unpredictable Species* Philip Lieberman,2013-04-21 How our brains have evolved so that we control how we think and behave The Unpredictable Species argues that the human brain evolved in a way that enhances our cognitive flexibility and capacity for innovation and imitation In doing so the book challenges the central claim of evolutionary psychology that we are locked into predictable patterns of behavior that were fixed by genes and refutes the claim that language is innate Philip Lieberman builds his case with evidence from neuroscience genetics and physical anthropology showing how our basal ganglia structures deep within the brain whose origins predate the dinosaurs came to play a key role in human creativity He demonstrates how the transfer of information in these structures was enhanced by genetic mutation and evolution giving rise to supercharged neural circuits linking activity in different parts of the brain Human invention expressed in different epochs and locales in the form of stone tools digital computers new art forms complex civilizations even the latest fashions stems from these supercharged circuits The Unpredictable Species boldly upends scientifically controversial yet popular beliefs about how our brains actually work Along the way this compelling book provides insights into a host of topics related to human cognition including associative learning epigenetics the skills required to be a samurai and the causes of cognitive confusion on Mount Everest and of Parkinson s disease **Beginning**
