La Maison De La Dispute:

From Something to Nothing Harry Fox, Daniel Maoz, Tirzah Meacham, 2019-05-24 Jewish mysticism approaches God as no thing or nothing reflecting Judaism's traditional identification of God as incorporeal. Whereas technical philosophical language often employed to discuss Jewish mysticism has a tendency to ward off otherwise interested readers, this study sufficiently breaks down the technical language of Jewish mysticism in its various expressions to allow a beginner to benefit from what may otherwise be indescribable and only approached by consideration of what is not rather than what is. Integral to the title *From Something to Nothing* is the concept that God cannot be something because that would be restricting so God is simply no thing. Ironically the conventional religious expression for the biblical notion of creation is something from nothing, whereas the title of this volume is its precise opposite which may at first seem to be illogical creation in reverse. However in a volume dedicated to various deliberations on magic and mysticism the ultimate reality may receive expression as nothingness that is no thingness, no quality associated with things. What adds to our difficulty today is that nothingness is inextricably linked with silence. Is silence also an element or indication of an ultimate reality or its absence? Or is it merely the reflection of nothing whatsoever? This is at the heart of modern debates between atheists and believers. Believers feel that even this silence speaks to this ultimate reality, whereas atheists claim that if you cannot show it then you do not know it. In other words, believers are victims of their own wishful thinking. *From Something to Nothing* memorializes Canadian mystic and scholar Zalman Schachter Shalomi's engaging in particular aspects that he addressed at some phase of his colourful and erudite life, providing the reader with a broad spectrum of both phenomenological and intellectual topics. **The Theater of Nature** Ann Blair, 2017-03-14 *The Theater of Nature* is the last work of the political philosopher Jean Bodin, his *Universae naturae theatrum* 1596. Through Bodin's work, Ann Blair explores the fascinating and previously little known world of late Renaissance natural philosophy. A study of the text of its context through comparisons with different genres of natural philosophy and works entitled *Theater* and of its reception in the seventeenth century highlights above all the religious motivations, encyclopedic ambitions and bookish methods characterizing much of late Renaissance science. Amid the religious crisis and the explosion of knowledge in the late sixteenth century, natural philosophy offered grounds for consensus across religious divides and a vast collection of useful and pleasant information admired for both its order and its variety. The commonplace book provided a versatile tool for gathering and sorting bits of natural knowledge garnered from a wide array of bookish sources and experience, fueling a vigorous cycle of text-based science at least through the mid-seventeenth century. The miscellaneous genre of the *problemata* into which Bodin's text was adapted attracted more popular audiences until even later. To place the *Theatrum* in its cultural context is also to reveal more clearly the peculiarities of Bodin's philosophical project in this its final expression. He combined arguments from reason, experience and authority to undermine traditional Aristotelian conclusions and proposed instead a natural philosophy based on pious, often biblical
