a) Define "Economic Development" and explain how it differs from "Economic Growth".

ANSWER

"Economic development" refers to an increase in the standard of living of a nations population associated with sustained growth from low income country to a modern one. It also refers to improvements in a variety of indicators such as literacy rate, life expectancy, poverty rates, etc.

On the other hand, "Economic growth" refers to an increase of a specific measure of a country such as:

- *National income (real or nominal)*
- *Gross Domestic Product (GDP)*
- *Per capita income*

b) Describe two main indicators by means of which growth and development are measured.

ANSWER
