History Of Computer Graphics Dlr Associates Series Dan Ryan:

History of Computer Graphics Dan Ryan, 2011-04-14 This book reflects the many changes that computer graphics technology has undergone in my working life time I graduated from a teachers college in 1963 There was not a computer of any kind on campus imagine my shock when my very first college employer Omaha University required me to know something about an IBM 1620 and a key punch machine The first part of this book is an account of that experience at Omaha University and later the Nebraska of Nebraska at Omaha When I moved to Clemson University in 1976 they had a computer and a large Calcomp Plotter but nothing else in the way of computer graphics hardware or software So except for a few short sections in chapter one this history begins with the events of 1963 and proceeds to document what happened to computer graphics for engineering design and manufacturing as practiced by an engineer or technician at Clemson University The next section of the book contains my experiences as a self employed consultant 1993 present my consulting started in 1984 after I completed a PhD in Data Systems Engineering In 1993 I left full time teaching and became Professor Emeritus at Clemson University I wanted to start my own consulting company DLR Associates Oddly enough most of my first consulting in computer graphics took place in the Omaha and Pennsylvania areas not South Carolina My contacts came from my paper presentations at various ASEE meetings and the annual national distance learning conferences held at the University of Maine I took a year off to accept a Fulbright Scholarship Nomination from the University of Roodee India I was listed as an international member in the Who's Who Directory of the computer graphics industry In a nutshell that is who I am Why then did I decide to write this book

E - Learning Modules Dan Ryan, 2012-06-20 The term e Learning is a neologism for CSCL systems that came about during the emergence of website e learning modules From an e learning perspective conventional e learning systems were then based on instructional packets which were delivered to students using assignments Assignments were evaluated by the instructor In contrast the new e learning places increased emphasis on social learning and use of social software such as blogs wikis podcasts and virtual worlds such as Second Life This phenomenon has also been referred to as Long Tail Learning E learning by contrast to e learning systems not based on CSCL assumes that knowledge as meaning and understanding is socially constructed Learning takes place through conversations about content and grounded interaction about problems and actions Advocates of social learning claim that one of the best ways to learn something is to teach it to others However it should be noted that many early online courses such as those developed by Murray Turoff and Starr Roxanne Hiltz in the 1970s and 80s at the New Jersey Institute of Technology courses at the University of Guelph in Canada the British Open University and the online distance courses at the University of British Columbia where Web CT now incorporated into Blackboard Inc was first developed have always made heavy use of online discussion between students Also from the start practitioners such as Harasim in 1995 have put heavy emphasis on the use of learning networks for knowledge construction long before the term e learning let alone CSCL was even considered There is

also an increased use of virtual classrooms online presentations delivered live as an online learning platform and classroom for a diverse set of education providers such as Minnesota State Colleges and Universities and Sachem MN School District In addition to virtual classroom environments social networks have become an important part of e learning Social networks have been used to foster online learning communities around subjects as diverse as test preparation and language education Mobile Assisted Language Learning MALL is a term used to describe using handheld computers or cell phones to assist in language learning Some feel however that schools have not caught up with the social networking trends Few traditional educators promote social networking unless they are communicating with their own colleagues DLR Associates consulting group first became interested in e learning modules at the annual Distance Learning Conference held at the University of Maine I decided to offer e learning services since we were already evolved with computer assisted education techniques DLR Associates had been involved with CAE since computers were first used in engineering education It was our hope a trend could be started towards blended learning services where computer based activities were integrated with practical or classroom based situations Dan Ryan Professor Emeritus Clemson University
