consolidating democracy has been relatively easy while for others it has proved more complex and harder to sustain In this important new textbook Jeff Haynes seeks to explain why these differences occur Adopting a broadly comparative approach he begins by examining the theories and practice of democratic transition and consolidation in the new democracies of Africa Asia Latin America and the Middle East Haynes argues persuasively that a country s ability to consolidate democracy depends not only on the interaction of structural and agency factors but also on a variety of specific domestic and international concerns which may help or hinder democratic progress Using a wide range of case studies to illustrate his argument Haynes provides an accessible and comprehensive analysis of the processes and problems of democratic consolidation in developing nations This is an important textbook that will be invaluable to students in a variety of areas from politics and comparative politics to development studies and history Receipts and Expenditures in Cuba from Jan. 1, 1899, to Apr. 30, 1900 United States.
