Household Acids and Bases

Many common household solutions contain acids and bases. Acid-base indicators, such as litmus and universal indicator solution turn different colors in acidic and basic solutions. They can, therefore, be used to show if a solution is acidic or basic. An acid turns blue litmus paper red, and a base turns red litmus paper blue. The acidity of a solution can be expressed using the pH scale. Acidic solutions have pH values less than 7, basic solutions have pH values greater than 7, and neutral solutions have a pH value equal to 7.

In this experiment, you will use litmus and a computer-interfaced pH Sensor to determine the pH values of household substances. After adding universal indicator to the same substances, you will determine the different universal indicator colors over the entire pH range.
