Benigno, 2017-04-21 Through questions such as What is power How are revolutions generated Does public opinion really exist What does terrorism mean and When are generations created Words in Time scrutinizes the fundamental concepts by which we confer meaning to the historical and social world and what they actually signify analysing their formation and use in modern thought within both history and the social sciences In this volume Francesco Benigno examines the origins and development of the words we use critiquing the ways in which they have traditionally been employed in historical thinking and examining their potential usefulness today Rather than being a general inventory or a specialized dictionary this book analyses a selection of words particularly relevant not only in the idiom and jargon of the social sciences and history but also in the discourse of ordinary people Exploring new trends in the historical field of reflection and representing a call for a new more conscious historical approach to the social world this is valuable reading for all students of historical theory and method      The Value of Work and Its Rules between Innovation and Tradition Anthony Forsyth, Margherita Roiatti, Emanuele

Dagnino, 2020-10-15 The global challenges resulting from economic demographic ecological changes have led individuals to evaluate the advisability of creating new work identities adopting a perspective based on social justice and sustainability In this sense this book examines the ways and the means through which the principle labour is not a commodity has been developed and the practical implications thereof It will serve to help academics and practitioners in a number of fields to understand the ongoing socio economic changes and the impact of globalisation today and to analyze the role of public institutions and private stakeholders operating in the context where this principle is implemented      **Psychological**

**Constructivism and the Social World** Gabriele Chiari, Maria Laura Nuzzo, 2003      Autonomie Der Vernunft? Riccardo Dottori, 2009 This volume contains the Proceedings of the V Meeting Italian American Philosophy on the Theme Autonomy of Reason that took place in Rome from the 16th to the 19th October 2007 Reason that is purely autonomous in self legislating

is completely empty and impotent or incapable of self determination Self determination exists only in that realm of the spirit that is not simply the realm of ends but a historical society based on reciprocal recognition that is established through law and finally freely self determined only through acting in a state that has as its last end the achievement of freedom *Italian Politics* Martin J. Bull, James L. Newell, 2005 This wide ranging book seeks to unravel the complexities of post 1992 Italian democracy It takes as its point of departure the dramatic political tensions of the early 1990s and evaluates these against the background of an analysis of the First Republic that predates these changes Martin Bull and James Newell renowned scholars of Italian Politics argue that the early 1990s revolution in Italian party politics should be seen both as a major cause of subsequent changes in the political system and as a consequence of longer term still on going changes in the Italian polity The book explains how we can understand in this light the mixed success of the parties in attempting to act as autonomous vehicles of reform and therefore why if we are witnessing a transformation to a Second Republic many of its key features still remain to be shaped Each of the thematic chapters clearly juxtaposes Italy as it was before the 1990s with Italy today thereby evaluating the degree to which the early 1990s can be seen as a watershed In this way the book offers a novel account of both contemporary political developments and their historical significance in the context of the Italian political model that took shape in the period after 1945 This will be essential reading for all students of Italian and Comparative Politics who will find the clarity and breadth of the book invaluable Equally scholars will be fascinated by this new and compelling argument

Shared Rule in Federal Theory and Practice Sean Mueller, 2024-09-23 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read on the Oxford Academic platform and offered as a free PDF download from OUP and selected open access locations In *Shared Rule in Federal Theory and Practice* Sean Mueller provides a new in depth treatment of shared rule a crucial but so far largely neglected dimension of federalism and multilevel governance He discusses shared rule's conceptual evolution and defines three different meanings commonly ascribed to it shared rule as horizontal cooperation centralization or bottom up influence seeking An original expert survey conducted among 38 federalism scholars in 11 countries is used to measure actual regional government influence over national decisions Drawing on a wide range of literature from lobbying and political parties to power sharing and secessionism the author then investigates the emergence and impact of shared rule thus understood The evidence presented includes qualitative case studies on Belgium Canada Germany Spain Switzerland and the US as well as quantitative cross sectional analyses at regional and national level Mueller shows that shared rule has the potential to become the holy grail of territorial politics in that it satisfies both those wanting greater unity and uniformity of policy making as well as those desiring greater regional autonomy and recognition of diversity Building on the conceptual and empirical groundwork laid by the Regional Authority Index he takes us further and deeper still into the mechanics of territorial contestation cooperation and cohesion

**Ancient Narrative Volume 2 (2002) , Apples and Oranges** Bruce Lincoln, 2018-08-22 Comparison is an indispensable intellectual operation that plays a crucial role in the formation of knowledge Yet comparison often leads us to forego attention to nuance detail and context perhaps leaving us bereft of an ethical obligation to take things correspondingly as they are Examining the practice of comparison across the study of history language religion and culture distinguished scholar of religion Bruce Lincoln argues in Apples and Oranges for a comparatism of a more modest sort Lincoln presents critiques of recent attempts at grand comparison and enlists numerous theoretical examples of how a more modest cautious and discriminating form of comparison might work and what it can accomplish He does this through studies of shamans werewolves human sacrifices apocalyptic prophecies sacred kings and surveys of materials as diverse and wide ranging as Beowulf Herodotus's account of the Scythians the Native American Ghost Dance and the Spanish Civil War Ultimately Lincoln argues that concentrating one's focus on a relatively small number of items that the researcher can compare closely offering equal attention to relations of similarity and difference not only grants dignity to all parties considered it yields more reliable and more interesting if less grandiose results Giving equal attention to the social historical and political contexts and subtexts of religious and literary texts also allows scholars not just to assess their content but also to understand the forces problems and circumstances that motivated and shaped them
