Queuing Models in Industry and Business Aliakbar Montazer Haghighi, Dimitar P. Mishev, 2008 Studies on queueing models and their publication in professional journals and textbooks have been sparse over the past eleven decades Collections of some of these studies have appeared either as single volumes or just chapters of single volumes and or monographs This book is an attempt to present some queueing models especially those applicable in business and industry in a style between a monograph and a textbook Also the need of researchers and practitioners for a handbook type text and the current lack of it explain the need for a book of this kind Most of the basic terminologies and concepts that appear throughout the text are introduced in a systematic way in the first two chapters nevertheless previous exposition to a first course in probability and statistics is advised for later chapters
