Grade 1 exemplar 2014 Kzn:

Left Universalism, Africentric Essays Ato Sekyi-Otu, 2018-08-06 Left Universalism Africentric Essays presents a defense of universalism as the foundation of moral and political arguments and commitments. Consisting of five intertwined essays, the book claims that centering such arguments and commitments on a particular place in this instance the African world is entirely compatible with that foundational universalism. Ato Sekyi Otu thus proposes a less conventional mode of Africentrism, one that rejects the usual hostility to universalism as an imperialist Eurocentric hoax. Sekyi Otu argues that universalism is an inescapable presupposition of ethical judgment in general and critique in particular and that it is especially indispensable for radical criticism of conditions of existence in postcolonial society and for vindicating visions of social regeneration. The constituent chapters of the book are exhibits of that argument and question some fashionable conceptual oppositions and value apartheid. This book will be of great interest to students and scholars in the fields of social and political philosophy, contemporary political theory, postcolonial studies, African philosophy, and social thought. **Climate Change Epistemologies in Southern Africa** Jörn Ahrens, Ernst Halbmayer, 2023-05-26 This book investigates the social and cultural dimensions of climate change in Southern Africa, focusing on how knowledge about climate change is conceived and conveyed. Despite contributing very little to the global production of emissions, the African continent looks set to be the hardest hit by climate change. Adopting a decolonial perspective, this book argues that knowledge and discourse about climate change has largely disregarded African epistemologies, leading to inequalities in knowledge systems. Only by considering regionally specific forms of conceptualizing, perceiving, and responding to climate change can these global problems be tackled. First exploring African epistemologies of climate change, the book then goes on to the social impacts of climate change, matters of climate justice, and finally institutional change and adaptation. Providing important insights into the social and cultural perception and communication of climate change in Africa, this book will be of interest to researchers from across the fields of African studies, sociology, anthropology, philosophy, political science, climate change, and geography. **A Story, a Story** Gail E. Haley, 1988-02-28 Winner of the Caldecott Medal. Once all the stories in the world belonged to Nyame the Sky God. He kept them in a box beside his throne. But Ananse the Spider man wanted them and caught three sly creatures to get them. This story of how we got our own stories to tell is adapted from an African folktale.
