The researcher then identifies the research problem and the research objectives. The research objectives are the specific goals that the researcher wants to achieve. The research objectives are then used to develop the research design. The research design is the plan that the researcher uses to collect and analyze the data. The research design is then used to collect the data. The data is then analyzed and the results are reported. The results are then used to draw conclusions and make recommendations. The research process is a continuous one, and the researcher may need to revise the research design or the research objectives as the research progresses.
