Li,2021-05-03 This book examines the quality assessment movement in academic scholarship as globalization prompts a search for global measures of university services and output It gauges productivity in terms of universal publication metrics and considers ranking and research productivity from a comparative perspective The book considers the use of the impact factor as a gauge of publication value noting that this less important in countries lacking central government appropriations to universities and to research It argues that pressure to publish in certain journals and to research topics of interest to English language readers has been felt differentially in English language systems compared to others but also that performance pressures fall more on younger more junior contract staff than on senior and tenured professors It problematizes international comparisons of quality and analyses the benefits of a zone of ideas and metrics in a common language promoting international mobility efficiency collaboration but also the costs which are rarely borne equally across countries languages and cultures The book provides a strong evidence based contribution to major debates in contemporary higher education reforms and the measurement of academic output **Perry Rhodan NEO: Volume 4 (English Edition)**
