

Patterns of Industrialization

- Foundations of Industrialization
 - Eventually, cheap textile production depended on the steam engine – invented by Scottish engineer James Watt in 1765.
 - In 1815, George Stephenson successfully tested the first steam locomotive.
 - Eventually (by the mid 1850s) the steam engine was used to power ocean liners.
 - Therefore, the steam engine, originally used in textile mills, transformed the transportation industry as well, making it much cheaper for both people and goods to travel from place to place.
