

1036A Control Room Monitoring System

APPLICATIONS

Main Monitor For Large Control Rooms

SYSTEM

The General 1036A is an extremely powerful monitor system, designed for large control rooms. It consists of a 400 watt full range speaker enclosure and a 19" electronics rack, which contains active crossovers, three channel power amplifiers and sophisticated protection and diagnostic circuitry. The 1036A is designed for flush mounting in the control room wall, although it may be used free standing and can produce peak sound pressure levels in excess of 126 dB.

Bass, midrange and treble controls are included to allow the speaker to be matched to the acoustic conditions of different control rooms. The sensitivity of the system to its environment is minimized by the unique Directivity Control Waveguide (DCW) Technology, which provides excellent stereo imaging and frequency balance even in difficult acoustic situations. The system

can be used in both vertical and horizontal orientations by simply rotating the DCW unit.

PROTECTION CIRCUITRY

The Audio Processing Unit (APU), which contains the crossover, also contains diagnostic and protection circuits. These monitor the amplifier channels for each driver and will automatically reduce the monitor's input gain, to protect a driver from overload and distortion. Reducing the gain of the entire monitor, rather than just that of the overloaded channel, preserves its frequency balance. The protection circuitry also guards against DC, shorting and excessive temperature, and will take appropriate action to prevent damage. LED displays show the system's condition in detail on the APU front panel and in summarized form on the loudspeaker enclosure.

AMPLIFIERS

The treble, midrange and bass amplifiers produce 300, 600 and 2 x 1100 watts of short term power, respectively, with very low harmonic and intermodulation distortion. The electronics have been carefully designed to ensure the highest subjective sound quality currently possible. Thermal protection is provided for the amplifiers. A standard 5 m, 100 core cable is supplied for the speaker connection. Longer lengths are available on application.
