The Archaeologist's Manual for Conservation Bradley A. Rodgers, 2007-05-08 This is a Foreword by an archaeologist not a conservator but as Brad Rodgers says Conservation has been steadily pulled from archaeology by the forces of specialization p 3 and he wants to remedy that situation through this manual He sees this work as a call to action for the non professional conservator permitting curators conservators and archaeologists to identify artifacts that need professional attention and allow these professionals to stabilize most artifacts in their own laboratories with minimal intervention using simple non toxic procedures p 5 It is the mission of Brad's manual to bring conservation back into archaeology p 6 The degree of success of that goal depends on the degree to which archaeologists pay attention to and put to use what Brad has to say because as he says The conservationist archaeologist is responsible to make preparation for an artifact's care even before it is excavated and after its storage into the foreseeable future a tremendous responsibility p 10 The manual is a combination of highly technical as well as common sense methods of conserving wood iron and other metals ceramics glass and stone organics and composites a far better guide to artifact conservation than was available to me when I first faced that archaeological challenge at colonial Brunswick Town North Carolina in 1958 a challenge still being faced by archaeologists today The stage of conservation in 1958 is in dramatic contrast to the procedures Brad describes in this manual conservation has indeed made great progress For instance a common procedure then was to heat the artifacts red hot in a furnace a method that made me cringe

Chemical Principles of Textile Conservation Agnes Timar-Balazsy, Dinah Eastop, 2012-09-10 Chemical Principles of Textile Conservation provides must have knowledge for conservators who do not always have a scientific background This vital book brings together from many sources the material science necessary to understand the properties deterioration and investigation of textile artefacts It also aids understanding of the chemical processes during various treatments such as cleaning humidification drying disinfestation disinfection and the use of adhesives and consolidants in conservation of historical textiles Textile conservators will now have ready access to the necessary knowledge to understand the chemistry of the objects they are asked to treat and to make informed decisions about how to preserve textiles The combination of a chemist and a conservator provides the perfect authorial team It ensures a unique dual function of the text which provides textile conservators with vital chemical knowledge and gives scientists an understanding of textile conservation necessary to

direct their research The many practical examples and case studies illustrate the utility of the relatively large chemical introduction and the essential chemical information which is included The case studies many illustrated in colour range from the treatment of the Ghandis clothes high altitude flying suits and a Mary Quant raincoat to the Hungarian Coronation

Staging Indigenous

Heritage Yunci Cai, 2020-08-12 *Staging Indigenous Heritage* examines the cultural politics of four Indigenous cultural villages in Malaysia. Demonstrating that such villages are often beset with the politics of brokerage and representation, the book shows that this reinforces a culture of dependency on the brokers. By critically examining the relationship between Indigenous tourism and development through the establishment of Indigenous cultural villages, the book addresses the complexities of adopting the culture for development paradigm as a developmental strategy. Demonstrating that the opportunities for self representation and self determination can become entwined with the politics of brokerage and the contradictory dualism of culture, it becomes clear that this can both facilitate and compromise their intended outcomes. Challenging the simplistic conceptualisation of Indigenous communities as harmonious and unified wholes, the book shows how Indigenous cultures are actively forged, struggled over and negotiated in contemporary Malaysia. Confronting the largely positive rhetoric in current discourses on the benefits of community based cultural projects, *Staging Indigenous Heritage* should be essential reading for academics and students in the fields of museum studies, cultural heritage studies, Indigenous studies, development studies, tourism, anthropology and geography. The book should also be of interest to museum and heritage professionals around the world.
