

Installing the Exciter

- Ensure that the power supply and network are turned off to prevent electrical shock or damage to equipment.
- Touch your hand to ground to discharge any electrostatic charge before handling the Exciter.

The steps below correspond to the numbers in Figure 1.

- Exciter and record the Location Identification number onto the facility floor plan indicating the Exciter's position and network wiring path. Use the run-way marker on the Exciter's Network ID label.
- Install the supplied door contact or PIR sensor according to the manufacturer's instructions and connect it to the terminal, as shown in the wiring diagrams. Connect the L-bracket/Network ID, Network ID/PIR, and Power Supply to the terminal blocks, as shown in the wiring diagrams. If the Exciter is at the end of the network, then terminate the network segment with Item A (100-Ω terminator). Refer to Detail A, and locate the terminals into the connections on the Exciter.

Note: If installing keypad or accessory device, or if using a master/slave configuration, proceed to the relevant section on the opposite page, and then return to steps 3 and 4.

- Ensure that the system LED of the Exciter will be visible. Refer to the facility floor plan for location, and using the Exciter's location or connection mark the location of the first mounting holes. Drill the holes.

- Mount the Exciter.

L-bracket installation

- Drill in the first mounting holes: 4 holes and 1 anchor.
- Attach the Exciter to the L-bracket, using: 4 No. 10 screws and machine screws; 4 screws and lock washers.
- Attach the assembled Exciter and L-bracket to the previously installed hollow wall sections, using: 4 No. 10 wood screws; 4 1-in. long.

Surface mount installation

- Drill in the four mounting holes: 4 holes and 1 anchor.
- Insert into the wall sections, leaving 1/8 in. (3.175 mm) out of the shell exposed.
- If using surface wire conduit, attach the four supplied Runways (Item B in Figure 1) to the outside of the Exciter.
- Align the Exciter with the mounting screws, and while lightly pressing, slide until it is securely in place. Insert the supplied screw caps.

Installation is complete. Proceed to Final Steps below.

Installing Keypads

A single keypad may be connected to an Exciter to enable an alarm to be triggered on the door. The keypad also releases the Exciter's relay, for example, to discharge a magnetic door lock. Plug into the Wiegand-enabled KTF-10000 keypad, which offers individual passwords for each user.

Refer to the Wiegand Installation Manual and the manufacturer's instructions. Keypads may be connected to either master or slave Exciter.

Note: The keypad requires a separate 12 VDC power supply.

Installing Accessory Devices

Each Exciter has two 30 VDC, 1 Amp. NO/NC relay for controlling accessory devices, such as magnetic door locks and high voltage doors.

Refer to the Wiegand Installation Manual and the manufacturer's instructions for installation procedures. Devices may be connected to either master or slave Exciter; connect devices to the master Exciter's relay first, then connect additional devices to the slave Exciter, starting with the alarm.

Note: Accessory devices require their own power supply.

Master/Slave Installations

Master and slave Exciters are installed and connected to the Run-Ways network in the same way as other Exciters, with the following additions:

- All conductive metalwork must be connected to earth using their M5 and ground terminals using 20-22AWG wire, as shown in the wiring diagrams.

For slave Exciters using their own ID numbers, the following is also required, as shown in Figure 3:

- The relay lock for distance hold support is wired to the relay on both the master and the slave to ensure that all doors in the network will lock when a tag is present.
- Door contacts are wired together in series so the door contact input on both the master and the slave. The result is that when any door in a master/slave configuration is open, the system behaves as if all doors are open as door will react if a tag is in a door in the vicinity of a door that is open.

Final Steps

Do not supply power to the Exciter or any other network device until all connections are complete.

Once all devices are installed, power up the Exciter and other devices in the Wiegand system software, run Auto Configure to install the new devices, and then configure them for operation.

The coverage area of each Exciter must also be checked.

Refer to the Wiegand Installation Manual (p/n 4050001) for detailed information on how to complete these steps.
