In recent years tax reporting on the effective tax rate ETR of multinational enterprises has been widely debated Annual reports presenting low ETRs created the impression that enterprises did not pay enough taxes compared to individuals or small and medium sized businesses Such financial reporting disclosures led to ongoing discussions about the suitability of the existing international tax system and gave rise to several global tax reforms initiated by the OECD This study analyses the level of compliance with internationally applied best practice for tax reporting on the ETR under the IAS 12 in annual reports based on content analysis scores It studies the correlations between the extent of compliance with tax reporting best practice and ETR values market capitalisation level of internationalisation industry and auditor The author combines the empirical research with a normative approach and thus takes an inside out perspective The normative analysis interprets IAS 12 paragraphs in light of Swiss national and international tax law Furthermore the book discusses the impact of the OECD Global Minimum Tax Reform on tax disclosures and argues that the international tax reform will further increase the complexity of tax reporting

**The 2008 Budget** Great Britain. Parliament. House of Commons. Treasury Committee,2008 This report examines the forecasts and measures contained in the 2008 Budget HC 455 session 2007 08 ISBN 9780102953336 The Treasury's lower forecasts for economic growth in 2008 and 2009 are above the average of independent forecasters suggesting that the Treasury may have given insufficient weight to the risks of continued financial market turbulence and that some of the UK economy's characteristics that have proven beneficial in past crises rapidly rising residential property prices close links with the US and an increasing reliance on the financial services industry for example might prove to be conduits through which the current problems in global financial markets are transmitted to the UK real economy The further weakening of the forecasts for the public finances is noted and it appears premature for the Treasury to state that it is on course to meet the golden rule in the next economic cycle given the lack of an end date for the previous economic cycle Measures on child poverty are welcomed but there is a need for a clear explanation on deployment of resources to ensure that the target to halve child poverty by 2010 11 will be achieved The abolition of the 10 pence rate of income tax will most affect those under 65 years of age in childless households earning under 18 500 the Committee feels this group is an unreasonable target for raising additional tax revenues The Treasury should commission research into whether the withdrawal of the 10 pence income tax band and high marginal deduction rates are creating disincentives that could frustrate the Government's welfare to work objectives The Committee also calls for a national Saving Gateway targeted

at low income households and more consideration of tax changes on the middle and lower income groups of non domiciled taxpayers      ESG Reporting Manual: 500+ Legal Tips and Tricks to Improve Your ESG Reporting Robin
