Moral Choices for Our Future Selves Eleonora Viganò, 2022-06-28 This book investigates the relationship between our present and future selves It focuses specifically on diachronic self regarding decisions choices involving our earlier and later selves in which the earlier self makes a decision for the later self The author connects the scientific understanding of the neurobehavioral processes at the core of individuals' perceptions of their future selves with the philosophical reflection on individuals' moral relationship with their future selves She delineates a descriptive theory of the perception of the future self that is based on empirical evidence and that systematizes and integrates the current theoretical literature She then argues for the morality of prudence and interprets diachronic self regarding decisions as decisions between two agents the earlier and later selves that belong to the realm of intergenerational ethics which regulates the relationship between contemporary people and future generations Finally the author provides a moral theory of prudence based on respect for one's agency This theory identifies what the present and the future selves owe to one another

Schneider,M. Weinelt,2006-04-10 MARGO Multiproxy Approach for the Reconstruction of the Glacial Ocean surface summarizes the results of the MARGO international working group with the aim to develop an updated and harmonised reconstruction of sea surface temperatures and sea ice extent of the Last Glacial Maximum oceans The MARGO approach differs from previous efforts by developing and consistently applying measures of various aspects of reconstruction reliability and by combining faunal and geochemical proxies In 14 papers the volume provides a comprehensive review of earlier work and a series of new proxy specific reconstructions based on census counts of planktonic foraminifera diatoms radiolaria and dinoflagellate cysts as well as on Mg Ca measurements in planktonic foraminifera The approach of harmonising the

calibration and application of different proxies is described in detail various paleothermometry techniques and their results are compared and the challenge of treating sparsely sampled data as the basis for ocean circulation models is addressed The use of stable oxygen isotope composition of foraminiferal shells as a proxy for past sea water composition is comprehensively reassessed and a new approach to the transfer function paleothermometer is presented This volume represents a landmark contribution to the understanding of ice age oceanography as well as the proxies used to reconstruct past ocean states The results will form the basis for forcing and validation of ocean circulation models New regional reconstructions of Last Glacial Maximum ocean temperatures and sea ice cover Compilation of new calibration and fossil datasets as well as documentation of techniques and approaches to paleoenvironmental reconstructions Comparison of techniques proxies and modelling approaches

Screened Stages Rachel Joseph, 2024-02-28 This book is devoted to tracing the variety of ways that theatre theatricality and performance are embedded in Hollywood cinema as screened stages A screened stage is the literal or metaphorical appearance of a stage on screen When the Hollywood style emerged in cinema history it traumatically severed the entwined relationship between film and theatre The book makes the argument that cinema longs for theatre after that separation The histories of stage and screen persistently crisscross one another making their separation problematic The screened stage from the end of the nineteenth century until now offers a miniaturized version of cinema and theatre history Moments of the stage within the screen compress historical styles and movements into saturated representations on film Such examples overflow the cinematic screen into singular manifestations of presentness Screened stages uncover what it means to be simultaneously present and absent This book would be of great interest to students and scholars of theatre film dance and performance
