Cost Estimating Manual for Pipelines and Marine Structures John S. Page, 1977-01-01. From the Book Preface: This manual has been compiled to provide time frames, labor, crews and equipment spreads to assist the estimator in capsulizing an estimate for the installation of cross country pipelines, marshland pipelines, nearshore and surf zone pipelines, submerged pipelines, wharfs, jetties, dock facilities, single point mooring terminals, offshore drilling and production platforms and equipment and appurtenances installed thereon. The time frames and labor and equipment spreads which appear throughout this manual are the result of many time and method studies conducted under varied conditions and at locations throughout the world. These time frames and labor and equipment spreads reflect a complete unbiased view of all operations involved. When one is engaged in compiling an estimate from any information furnished by others, as is the case with this manual, he should view it in an objective light, giving due consideration to the nature of the project at hand and evaluating all items that may affect the productivity of labor and all other elements involved.
