Guidelines by also making use of existing guidelines The consultation was attended by 15 experts one resource person and FAO staff The consultation was organized into both plenary and group discussions The Experts agreed on a proposed methodology for identifying and selecting the lessons learned from strategies and experiences of aquaculture development worldwide a methodology for documenting and analysing the lessons learned a list of thematic modules a gap analysis between existing guidelines and needs for new ones and an updated roadmap for the development of the Sustainable Aquaculture Guidelines   *Technical guidance for the development of the growing area aspects of bivalve mollusc sanitation programmes* ,2021-08-25   **WHO recommendation on vaginal preparation with antiseptic agents for women undergoing caesarean section** ,2021-06-18 While the evidence on vaginal preparation before caesarean section was largely derived from trials using povidone iodine benefit was demonstrated overall for any antiseptic either povidone iodine or chlorhexidine gluconate versus no antiseptic Included trials used varying concentrations of chlorhexidine gluconate 0 05% to 0 25% or povidone iodine 1% to 10% and the base aqueous or alcohol was not described However the Guideline Development Group agreed that alcohol based antiseptic solutions should not be used for vaginal preparation because of concerns around irritation of mucosa This recommendation pertains to all women undergoing caesarean section regardless of their baseline risk of infectious morbidity following surgery i e for caesarean section in women before or during labour and women with intact or ruptured membranes Whilst available trials were not clear on the timing of vaginal preparation relative to the caesarean section the Guideline Development Group suggested that vaginal preparation should be performed as close to the start of caesarean section as possible e g directly following preoperative urinary bladder catheterization to minimize the woman s discomfort   <u>WHO recommendations on choice of antiseptic agent and method of application for preoperative skin preparation for caesarean section</u> ,2021-06-18 There was a lack of evidence to recommend a specific concentration of chlorhexidine gluconate however most trials included used 2% chlorhexidine gluconate in 70% alcohol Maternal allergy to alcohol based chlorhexidine gluconate must be excluded before surgery In women with no previous history of allergy to alcohol based chlorhexidine gluconate it should be noted that chlorhexidine gluconate can cause skin irritation A standard preoperative skin preparation technique that is appropriate for the intended skin incision must be followed As alcohol is highly flammable alcohol based antiseptic preparations may ignite if used in the presence of diathermy and they must be allowed to dry by evaporation It is advisable to ensure that the drapes are not saturated with alcohol or that the alcohol based solution has not formed a pool underneath the woman before starting surgery Particular care should be taken at emergency caesarean section Where chlorhexidine gluconate is not available other antiseptic agent such as povidone iodine can be considered a suitable antiseptic agent for preoperative skin preparation although it is not as effective as alcohol based chlorhexidine gluconate The Guideline Development Group noted that the current recommendation is consistent with the 2016 WHO global guidelines on the prevention of surgical site infection which recommends chlorhexidine gluconate alcohol

based antiseptic solutions for surgical site skin preparation in individuals undergoing surgical procedures   **Seismic Rehabilitation of Buildings** ,1993-07   Strengthening Climate Resilience Guidance for Governments and Development Co-operation OECD,2021-03-16 This guidance provides a tool governments and development co operation can draw on in their efforts to strengthen the resilience of human and natural systems to the impacts of climate change It highlights three aspirations to consider when planning and implementing action to build climate resilience country ownership inclusiveness and environmental and social sustainability   *Software Process Improvement and Management: Approaches and Tools for Practical Development* Fauzi, Shukor Sanim Mohd,Nasir, Mohd Hairul Nizam Md,Ramli, Nuraminah,Sahibuddin, Shamsul,2011-11-30 Over the past decade there has been an increase in attention and focus on the discipline of software engineering Software engineering tools and techniques have been developed to gain more predictable quality improvement results Process standards such as Capability Maturity Model Integration CMMI ISO 9000 Software Process Improvement and Capability dEtermination SPICE Agile Methodologies and others have been proposed to assist organizations to achieve more predictable results by incorporating these proven standards and procedures into their software process Software Process Improvement and Management Approaches and Tools for Practical Development offers the latest research and case studies on software engineering and development The production of new process standards assist organizations and software engineers in adding a measure of predictability to the software process Companies can gain a decisive competitive advantage by applying these new and theoretical methodologies in real world scenarios Researchers scholars practitioners students and anyone interested in the field of software development and design should access this book as a major compendium of the latest research in the field   *Earthquake Hazards Reduction Series* ,1992   **Guidance for Professional Development in Drinking Water and Wastewater Industry** Archis Ambulkar,2015-02-15 Guidance for Professional Development in Drinking Water and Wastewater Industry recognises the water practitioners journey from the novice student phase all the way to an established expert position both on technological and professional fronts This book reviews various career phases and helps realise purpose motivation responsibilities and milestones for each professional stage Since professional journeys are significantly different for individuals and designations titles vary widely from organization to organization general terminologies are used for describing career phases mainly Student Phase Entry Level Professional Mid Level Professional and Established Practitioner This guide helps the reader to understand a step by step professional development process in the industry and at the same time receive key inputs to minimise or avoid common mistakes related to the drinking water or wastewater occupations The book provides an overview of common educational options available for students including short term courses diploma and certificates associate degrees bachelor degree masters degree doctorate degree post doctoral fellowship and continued education With respect to job profiles the guide covers different professional avenues such as consultant engineer designer researcher academic faculty member sales and marketing permitting authority staff laboratory
