Internal Control Contributions To Management Science:

Internal Control Olof Arwinge, 2012-11-07 The concept of internal control has developed along with audit practice As demands have been made for greater accountability in corporate governance the significance of internal control systems in companies has increased Traditionally internal control has had a fairly direct relationship to financial reporting quality but wider approaches to internal control have expanded those boundaries much further Stakeholders are increasingly concerned with the effectiveness of internal controls and disclosure requirements are making firms to go public with regard to their internal control systems From a design perspective current research suggests that internal control designs are contingent upon variables such as company strategies risk appetite regulatory characteristics and organizational size Also there is much to learn about internal control quality and the way internal control quality is associated with overall corporate governance quality This book fills that gap

Financial Accounting and Management Control Fredrik Nilsson, Anna-Karin Stockenstr nd, 2015-02-20 This book is about financial accounting and management control and how these two information systems are related as well as how their objectives conflict At the most fundamental level the objective of financial accounting is to provide owners and funders with comparable

information on a company's value creation. The aim of management control on the other hand is to give the board, senior executives and employees unique information for strategy formulation and implementation. One often mentioned negative effect is the risk of financial accounting affecting management control design and use, making it less relevant for decision making at the company level. The book provides an analysis of the complex relationship between financial accounting and management control. The analysis is based on theoretical reasoning as well as several examples of how financial accounting standards affect not only the annual report but also the control system. An interesting and perhaps unexpected conclusion is that management control seems to affect financial accounting almost as much as financial accounting affects management control. These complex relationships which can influence the design and use of both financial accounting and management control are discussed in detail in this book.

The Evolution of Corporate Disclosure Alessandro Ghio, Roberto Verona, 2020-04-02 This book provides a critical analysis of the evolution of corporate disclosure. Building upon prior academic literature, it assesses the most important changes in mandatory corporate disclosure, the growing relevance of social and environmental disclosure, and revolutionary new forms of corporate communication in particular social media. It also includes empirical analyses that shed further light on the impact of voluntary communication, i.e. social and environmental reporting, and corporate social media communication on managerial and investment decisions. Lastly, it discusses new directions for accounting and corporate governance research on the theoretical and empirical challenges of corporate disclosure. Offering a wealth of relevant and timely advice, the book will help regulators design policies that allow businesses to overcome current and emerging economic, social, and technological challenges.

FUND MANAGEMENT PRACTICES IN NON-GOVERNMENTAL ORGANIZATIONS Dr. N. VISWANADHAM, B. MGANILWA, 2019-04-03 Fund management is a critical function in organizations' success. As a result, organizations or institutions that manage their finances well have higher chances of success. Zietlow et al. (2007) contend that fund management is more than just keeping accurate accounting records. It involves planning, controlling, and monitoring of financial resources to achieve organizational objectives. The system of fund management should ensure that costs are properly categorized, tracked, and charged to the appropriate accounts, and therefore managers are required to report financial information accurately to the board, donors, and government. Yet, fund management provides a financial framework for efficient management of NGO resources.
