Advances in Research on Reading Recovery Jerome V. D'Agostino, 2018-12-07 There is no shortage of innovative educational programs the challenge is learning how to scale and sustain those with strong evidence of effectiveness This book focuses on Reading Recovery one of the few educational innovations that has successfully expanded and established itself in several educational systems in the world Developed by Marie Clay in New Zealand during the mid 1980s Reading Recovery is an intensive intervention for young students who are struggling to learn how to read and has expanded to several countries across the globe over the last 30 years Providing evidence of the intervention s effectiveness both in the short and long term this volume presents in depth studies to elucidate why the program is effective discusses the trials and tribulations in scaling and sustaining the program and approaches scaling and maintaining from theoretical and practical perspectives The contributors to this book explain how Reading Recovery has established itself because it has maintained a strong focus on evidence developed a deep sense of community among its practitioners and was at the forefront in enhancing professional development of the teachers who delivered the intervention Understanding the implementation experiences of the intervention is beneficial for any innovation developer who wishes to grow and sustain an intervention The chapters in this book were originally published as articles in the Journal of Education for Students Placed At Risk *Instrumento de Observación de Los Logros de la Lecto-escritura Inicial* Kathy Escamilla, Marie M. Clay, 1996 Drawing on the theoretical framework that made Marie Clay s An Observation Survey such a success a new team of authors has developed and applied these same tasks for Spanish speaking students **Resources in Education** , 2001-10 **Differential Effects of a Multiple Intelligences Curriculum on Student Performance** Thanh T. Nguyen, 2002-06-08 The Fuller School is one of the six elementary schools in Gloucester Massachusetts a small urban community known for shipbuilding and fishing Fuller students come from a wide range of socioeconomic backgrounds from public housing facilities to affluent families and a variety of ethnic groups including Italian Hispanic and Vietnamese With its diverse population the Fuller School represented an excellent environment to test the use of Multiple Intelligences MI as a foundation for its curriculum This study aimed to examine one of the ten objectives of the FIRST Schools and Teacher Program Grant To improve student achievement on standardized tests by using multiple intelligences instruction The results of the California Achievement Test 5 CAT 5 given at grade 5 tended to show no differences between students in the MI and the traditional school program Although no association between CAT 5 outcomes and the MI treatment were found two report card outcomes at the sixth grade level Math and Physical Education and an interaction of Program type with Home language on Music were found to be significant By and large the magnitude of these differences was not large enough to conclude that the MI treatment was effective in producing larger standardized test scores than students in the non MI program Yet considering that the MI program emphasizes different kinds of activities and more diverse ways of learning and provides an alternative to the traditional

classroom this result of no differences between programs can be thought of a success for the MI community Participants in the MI program performed just as well as those who had been in the traditional program This case study is unusual because public schools rarely assigned their students randomly to experimental programs through a lottery process Although students were randomly assigned to MI and traditional classrooms accounting for several additional demographic variables in the students personal and family background helped to characterize the differences in student performance in language mathematics social studies science arts physical education and music Educators should find the results encouraging even with no differences in test scores and grades because this indicates that MI approaches are competitive with traditional ones These findings shed new light on the application of MI and given the growth in its use provides a much needed comparison for those interested in implementing it as one component of educational reform *Left Behind* Edward P. St.

John,2015-11-30 This book argues that American cities have been engaged for the past three decades in a radical but failing effort to transform general and vocational high schools into college preparatory institutions By examining the educational reforms in four urban charter schools across the United States and four public high schools in New York City it reveals how educators contend with the challenge of developing new courses while providing social support for students to build college going cultures *Bridges to Literacy* Diane E.
