Jones Guardian columnist and best selling author Never has it been more urgent to publicise the truth about what works and doesn't work in our education system Debunking the ideology of marketisation and exposing the half truths that pass for objective reporting Benn and Downs meticulously lay out the evidence that a national system of comprehensive schools delivers the best outcomes This hugely important book should be required reading for each new Education Secretary Caroline Lucas MP Opinions about comprehensive education are often made into easy to swallow sound bites by media and politicians alike and whilst the benefits of a genuinely comprehensive education for all pupils are obvious untruths have unwittingly evolved into hard facts Based on Melissa Benn and Janet Downs work as part of the pioneering Local Schools Network The Truth About Our Schools calls for us to urgently and articulately challenge unquestioned myths about state education Benn and Downs have meticulously built an argument for its still enormously vital role and rigorously challenge assumptions that Comprehensive education has failed Local authorities control and hold back schools Choice competition and markets are the route to educational success Choice will improve education in England the free school model Academies raise standards Teachers don't need qualifications Private schools have the magic DNA Progressive education lowers standards Anyone who thinks that comprehensive education cannot deliver that local authorities are the chief block to improving our school system that competition and markets are the route to educational success and that private schools hold the magic DNA that can simply be transferred to other state schools will have their beliefs shaken by this blisteringly incisive book
