Advanced Applications Jayant R. Haritsa, Ramamohanarao Kotagiri, Vikram Pudi, 2008-04-03 Coverage in this proceedings includes XML schemas data mining spatial data indexes and cubes data streams P2P and transactions complex pattern processing IR techniques queries and transactions XML databases data warehouses and distributed data The Cumulative Book Index, 1998 A world list of books in the English language *Intelligent Systems* L.S. Sterling, 2012-12-06 Published in honour of the 70th birthday of Yoh Han Pao George S Dively Distinguished Professor of Engineering at Case Western Reserve University Cleveland Ohio this festschrift embraces a remarkably diverse set of topics Drawing from the fields of pattern recognition engineering artificial intelligence and artificial neural systems it is a fitting testament to the extraordinary breadth of his professional interests both in foundational research into the new technology of Intelligent Systems and in the application of that evolving technology to the solution of hard engineering problems In common with many scientists who build their reputations in one field before devoting their considerable energies and talents to another one by 1972 the year in which I met him for the first time Yoh Han had made significant contributions to laser technology in particular to the development of the highly accurate and stable lasers required for holographic recording purposes In conventional holography the information stored in a hologram produces a virtual image of the object characterised by it However Yoh Han became fascinated by the possibility of driving the process backwards of using the hologram as an associative memory device enabling previously stored information to be retrieved on the basis of partial cues It was this burgeoning interest which shaped his career for more than twenty years Just prior to 1972 my colleagues Professor Christopher Longuet Higgins and Dr Intelligent Information and Database Systems Ngoc Thanh Nguyen, Ford Lumban Gaol, Tzung-Pei Hong, Bogdan Trawiński, 2019-04-02 The two volume set LNAI 11431 and 11432 constitutes the refereed proceedings of the 11th Asian Conference on Intelligent Information and Database Systems ACIIDS 2019 held in Yogyakarta Indonesia in April 2019 The total of 124 full papers accepted for publication in these proceedings were carefully reviewed and selected from 309 submissions The papers of the first volume are organized in the following topical sections knowledge engineering and semantic web text processing and information retrieval machine learning and data mining decision support and control systems computer vision techniques and databases and intelligent information systems The papers of the second volume are divided into these topical sections collective intelligence for service innovation technology management E learning and fuzzy intelligent systems data structures modelling for knowledge representation advanced data mining techniques and applications intelligent information systems intelligent methods and artificial intelligence for biomedical decision support systems intelligent and contextual systems intelligent systems and algorithms in information sciences intelligent supply chains and e commerce sensor networks and Internet of Things analysis of image video movements and brain intelligence in life sciences and computer vision and intelligent systems A First Course in Database Systems Jeffrey D. Ullman, Jennifer Widom, 2002 Written by well known computer scientists this accessible and succinct introduction to

database systems focuses on database design and use Provides a more extensive treatment of query processing than other books on the market The authors provide in depth coverage of databases from the point of view of the database designer user and application programmer It covers the latest database standards SQL 1999 SQL PSM SQL CLI JDBC ODL and XML with broader coverage of SQL than most other books Now includes coverage of the technologies used to connect database programming with C or Java code SWL PSM SQL CLI and JDBC For database systems and database design and application professionals

Database and Expert Systems Applications A Min Tjoa,Roland Wagner,2012-12-06 Use and development of database and expert systems can be found in all fields of computer science The aim of this book is to present a large spectrum of already implemented or just being developed database and expert systems Contributions cover new requirements concepts for implementations e g languages models storage structures management of meta data system architectures and experiences gained by using traditional databases in as many areas of applications as possible at least in the fields listed The aim of the book is to inspire a fruitful dialogue between development in practice users of database and expert systems and scientists working in the field

Next Generation Information Technologies and Systems Ron Y. Pinter,Shalom Tsur,2003-07-31 The Next Generation Information Technologies and Systems NGITS workshop series is a biannual event held in Israel since 1993 Like its predecessors NGITS 99 brings together active members of the international research community interested in information technology and knowledge based systems Many of the base technologies in the traditional areas of database management systems information retrieval and resource optimization are being deployed nowadays in novel systems and applications that flourish with the astonishing increase in computational power storage capacity communication and of course the advent of the world wide web These new fronts in turn present an ever growing set of challenges to the technologies such as data availability information integrity and knowledge extraction fuelling an exciting set of activities Our workshop clearly reflects this trend offering a rich sample of the state of the art at the close of the millennium and a glimpse of what is to come in the next one In response to the call for papers we received 34 high quality submissions 22 of which were carefully selected by the Program Committee for presentation at the workshop and inclusion in these proceedings These include 17 full length papers as well as 5 short papers that will be accompanied by demonstrations during the workshop In addition it is our pleasure to feature two invited talks given by Professor J Ullman of Stanford University and IBM Fellow C Mohan
