### YOUR FREE PLATFORM DEMO

Demo Account: Although demo accounts attempt to replicate real markets, they operate in a simulated market environment. As such, there are key differences that distinguish them from real accounts, including but not limited to, the lack of slippage or real-time market liquidity, a delay in pricing, and the execution of some orders which may not be possible in real accounts. The operational experience when executing orders in a demo environment may result in differently executed executions, but it is not intended to replicate the degree of exposure. There may be instances where margin requirements differ from those of live accounts as orders in demo accounts may not always coincide with those of real accounts.
