Science, Method, and Argument in Galileo Maurice A. Finocchiaro, 2021-08-28 This book collects a renowned scholar's essays from the past five decades and reflects two main concerns an approach to logic that stresses argumentation reasoning and critical thinking and that is informal empirical naturalistic practical applied concrete and historical and an interest in Galileo's life and thought his scientific achievements Inquisition trial and methodological lessons in light of his iconic status as father of modern science These republished essays include many hard to find articles out of print works and chapters which are not available online The collection provides an excellent resource of the author's lifelong dedication to the subject Thus the book contains critical analyses of some key Galilean arguments about the laws of falling bodies and the Copernican hypothesis of the earth's motion There is also a group of chapters in which Galileo's argumentation is compared and contrasted with that of other figures such as Socrates Karl Marx Giordano Bruno and his musicologist father Vincenzo Galilei The chapters on Galileo's trial illustrate an approach to the science vs religion issue which Finocchiaro labels para clerical and conceptualizes in terms of a judicious consideration of arguments for and against Galileo and the Church Other essays examine argumentation about Galileo's life and thought by the major Galilean scholars of recent decades The book will be of interest to scholars in philosophy logic philosophy of science history of science history of religion philosophy of religion argumentation rhetoric and communication studies

Galileo's Idol Nick Wilding,2014-11-27 Galileo s Idol offers a vivid depiction of Galileo s friend student and patron Gianfrancesco Sagredo 1571 1620 Sagredo s life which has never before been studied in depth brings to light the inextricable relationship between the production distribution and reception of political information and scientific knowledge Nick Wilding uses as wide a variety of sources as possible paintings ornamental woodcuts epistolary hoaxes intercepted letters murder case files and others to challenge the picture of early modern science as pious serious and ecumenical Through his analysis of the figure of Sagredo Wilding offers a fresh perspective on Galileo as well as new questions and techniques for the study of science The result is a book that turns our attention from actors as individuals to shifting collective subjects often operating under false identities from a world made of sturdy print to one of frail instruments and mistranscribed manuscripts from a complacent Europe to an emerging system of complex geopolitics and globalizing information systems and from an epistemology based on the stolid problem of eternal truths to one generated through and in the service of playful politically engaged and cunning schemes
