*An Introduction to Data Science With Python* Jeffrey S. Saltz, Jeffrey M. Stanton, 2024-05-29. An Introduction to Data Science with Python by Jeffrey S. Saltz and Jeffrey M. Stanton provides readers who are new to Python and data science with a step-by-step walkthrough of the tools and techniques used to analyze data and generate predictive models. After introducing the basic concepts of data science, the book builds on these foundations to explain data science techniques using Python-based Jupyter Notebooks. The techniques include making tables and data frames, computing statistics, managing data, creating data visualizations, and building machine learning models. Each chapter breaks down the process into simple steps and components so students with no more than a high school algebra background will still find the concepts and code intelligible. Explanations are reinforced with linked practice questions throughout to check reader understanding. The book also covers advanced topics such as neural networks and deep learning, the basis of many recent and startling advances in machine learning and artificial intelligence. With their trademark humor and clear explanations, Saltz and Stanton provide a gentle introduction to this powerful data science tool. Included with this title: LMS Cartridge. Import this title's instructor resources into your school's learning management system (LMS) and save time. Don't use an LMS. You can still access all of the same online resources for this title via the password-protected Instructor Resource Site.

**The Data Detective's Toolkit** Kim Chantala, 2020-12-15. Reduce the cost and time of cleaning, managing, and preparing research data while also improving data quality. Have you ever wished there was an easy way to reduce your workload and improve the quality of your data? The Data Detective's Toolkit: Cutting-Edge Techniques and SAS Macros to Clean, Prepare, and Manage Data will help you automate many of the labor-intensive tasks needed to turn raw data into high-quality analysis-ready data. You will find the right tools and techniques in this book to reduce the amount of time needed to clean, edit, validate, and document your data. These tools include SAS macros as well as ingenious ways of using SAS procedures and functions. The innovative logic built into the book's macro programs enables you to monitor the quality of your data using information from the formats and labels created for the variables in your data set. The book explains how to harmonize data sets that need to be combined and automate data cleaning tasks to detect errors in data, including out-of-range values, inconsistent flow, through-skip paths, missing data, no variation in values for a variable, and duplicates. By the end

of this book you will be able to automatically produce codebooks crosswalks and data catalogs **Advanced Reporting**
