An exercise planning table links each exercise with the chapters found in a number of the most commonly used HRM textbooks. Most of the cases are based on actual events drawn from the author's professional or consulting experience or from events first reported in the national media. Each case is intended to replicate and carry a high degree of fidelity to real world conditions as fully as possible. The experiments in the book are intended to serve as both discovery processes and illustrations of the procedures and rules invoked in developing human resources systems.
