| Image Sensor:  | 1/1.8 in.<br>Color CCD | Frame Rate                   | 27~15 fps |
| Pixel Density: | 20 mega pixel          | Analog to Digital Converter: | 14 bit    |

#### OPERATIONAL REQUIREMENTS

| Quality Control Items         | Description                                                                                                                                                                                                                                                      |
|-------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Shutter Lag and Start Up Time | Remember that the quoted continuous-shooting speed of a camera often applies to circumstances in which the flash is off, the focus and exposure are locked during the first picture of the batch.                                                                |
| Image Quality                 | Despite the camera's megapixel count, larger sensors and lenses typically result in sharper images. DSLRs take such beautiful pictures because of their larger sensors and higher-quality lenses, which generally produce better shots, especially in low light. |

#### Product Care Instructions

Regular dust cleaning with micro fiber cloth. Avoid using alcohol in any parts of the camera.
