The book also provides guidance about the many of the X10's many other advanced settings, including adjustments for Color Sharpness, Highlight Tone, Shadow Tone, and numerous others. The guide's more than 200 photographs, almost all in full color, provide illustrations of the camera's controls and menus and include examples of the various types of photographs that can be taken using the many creative settings of the camera, including the Film Simulation settings which let the photographer alter the color processing and other aspects of images. In addition, the book goes beyond everyday photography with introductions to more advanced topics such as infrared photography, astrophotography, digiscoping, street photography, and creating 3D three-dimensional images that can be viewed with conventional red and blue 3D glasses. The book also includes a full discussion of the video recording abilities of the Fujifilm X10, which can capture high-definition HD video with stereo sound and can take silent slow-motion movies to enable studies of sports and other actions.
