A Manual of the Ancient History of the East to the Commencement of the Median Wars François Lenormant, Elisabeth Chevallier,1871 The Cybersecurity Dilemma Ben Buchanan,2017-02-01 Why do nations break into one another s most important computer networks There is an obvious answer to steal valuable information or to attack But this isn t the full story This book draws on often overlooked documents leaked by Edward Snowden real world case studies of cyber operations and

policymaker perspectives to show that intruding into other countries networks has enormous defensive value as well Two nations neither of which seeks to harm the other but neither of which trusts the other will often find it prudent to launch intrusions This general problem in which a nation s means of securing itself threatens the security of others and risks escalating tension is a bedrock concept in international relations and is called the security dilemma This book shows not only that the security dilemma applies to cyber operations but also that the particular characteristics of the digital domain mean that the effects are deeply pronounced The cybersecurity dilemma is both a vital concern of modern statecraft and a means of accessibly understanding the essential components of cyber operations

Look Who's Watching, Revised Edition Fen Osler Hampson, Eric Jardine, 2017-11-08 The Internet ecosystem is held together by a surprisingly intangible glue trust To meet its full potential users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking while also being secure private and safe When trust in the Internet wanes the network s stock of digital social capital falls and users begin to alter their online behaviour These often subtle changes in behaviour tend to be collectively highly maladaptive hindering the economic developmental and innovative potential of the globe spanning network of networks Look Who s Watching Surveillance Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced Edward Snowden s revelations that the United States National Security Agency and other government agencies are spying on Internet users the proliferation of cybercrime and the growing commodification of user data and regulatory changes which threaten to fragment the system are all rapidly eroding the confidence users have in the Internet ecosystem Based on a combination of illustrative anecdotal evidence and analysis of new survey data Look Who s Watching clearly demonstrates why trust matters how it is being eroded and how with care and deliberate policy action the essential glue of the Internet can be restored
