cornfields of 1940s Iowa to Silicon Valley tech giants today This group of engineers philosophers bureaucrats and business leaders posited that innovators were society's most important change agents and remade the nation in their image The innovation culture they built transcended partisan divisions and made strange bedfellows Wisnioski shows how Kennedy era policymakers inspired President Nixon's dream of a Nobel Prize for innovators how anti military professors built the first university incubators for entrepreneurs how radical feminists became millionaire consultants how demands for a rust belt manufacturing renaissance inspired theories of a global creative class how programs that encouraged girls and minority children to pursue innovative lives changed the nature of childhood play and why the innovation consensus is now in dispute
