Armstrong, Lisa Morrow, 2010-08-09 This handbook celebrates the abundantly productive interaction of neuropsychology and medicine This interaction can be found in both clinical settings and research laboratories often between research teams and clinical practitioners It accounts for the rapidity with which awareness and understanding of the neuropsychological components of many common medical disorders have recently advanced The introduction of neuropsychology into practice and research involving conditions without obvious neurological components follows older and eminently successful models of integrated care and treatment of the classical brain disorders In the last 50 years with the growing understanding of neurological disorders neuropsychologists and medical specialists in clinics at bedside and in laboratories together have contributed to important clinical and scientific advances in the understanding of the common pathological conditions of the brain stroke trauma epilepsy certain movement disorders tumor toxic conditions mostly alcohol related and degenerative brain diseases It is not surprising that these seven pathological conditions were the first to receive attention from neuropsychologists as their behavioral symptoms can be both prominent and debilitating often with serious social and economic consequences

Military Sexual Trauma: Current Knowledge and Future Directions Carolyn Allard, Melissa Platt, 2014-06-11 Military Sexual Trauma Current Knowledge and Future Directions showcases the work of several prominent military sexual trauma MST researchers scholars and clinicians from across the United States A review of existing research and original empirical findings converge to indicate that MST contributes to a range of physical health problems complex posttraumatic responses

and other mental health consequences above and beyond the effects of other types of traumatic experiences This collection also presents evidence suggesting that MST is often difficult to identify both within the individual military member and within the military population as a whole Recommendations are offered for addressing this problem In addition to the research review and empirical findings an evolutionary framework for understanding sexual assault of women in the military is presented Taken together this collection of works may inform MST intervention and prevention efforts This book was originally published as a special issue of *Journal of Trauma Dissociation* *Research in Education* ,1973 **Resources in Education** ,1988 **ALA Glossary of Library and Information Science, Fourth Edition** Michael Levine-Clark,Toni M.
