Anand R. Prasad, John F. Buford, K. Vijay Gurbani, 2022-09-01 *Future Internet Services and Service Architectures* presents state of the art results in services and service architectures based on designs for the future Internet and related emerging networks. The discussions include technology issues, key services, business models, and security. The work describes important trends and directions. *Future Internet Services and Service Architectures* is intended to provide readers with a comprehensive reference for the most current developments in the field. It offers broad coverage of important topics with twenty chapters covering both technology and applications, written by international experts. The 20 chapters of *Future Internet Services and Service Architectures* are organized into the following five sections:

- Future Internet Services:** This section contains four chapters which present recent proposals for a new architecture for the Internet with service delivery in the Future Internet as the key focus.
- Peer to Peer Services:** Using the P2P network overlay as a service platform, five chapters explore the P2P architecture and its use for streaming services, communication services, and service discovery.
- Virtualization:** Virtualization and its benefits for resource management, supporting heterogeneity and isolation, are the basis for five chapters which describe virtualization at the endpoint in the cloud and in the network.
- Event Distribution:** Publish/Subscribe mechanisms are important for applications which require time sensitive delivery of notifications. The two chapters in this section present recent developments in publish/subscribe, load balancing, and in sensor networks.
- VANETs:** Vehicular Ad Hoc Networks (VANETs) are a network technology which are designed for vehicle to vehicle and vehicle to infrastructure connectivity for moving vehicles. The four chapters in this section provide an introduction to VANETs, routing services, and system architecture.

*Future Internet Services and Service Architectures* is complemented by a separate volume, *Advances in Next Generation Services and Service Architectures*, which covers emerging services and service architectures, IPTV, context awareness, and security.
