

A GLOBAL APPROACH FOR THE INTERPRETATION OF THE KINETIC SCHOOL DRAWING (KSD): A QUICK SCORING SHEET, REFERENCE GUIDE, AND RATING SCALE

JAC ANDREWS & HENRY JANZEN

*University of Alberta, Edmonton, Alberta,
Canada*

This paper presents a globally oriented scoring sheet, reference guide, and rating scale for facilitating clinical hypotheses from children's Kinetic School Drawings (KSDs) and further empirical evaluations of the KSD technique. The paper also provides information regarding the construction of these instruments, along with some preliminary findings in terms of the procedures' reliability and discriminant validity.

Since its presentation as a projective technique by Prout and Phillips (1974), the Kinetic School Drawing (KSD) has achieved moderate use by school and clinical psychologists in assessing children's perceptions of themselves, their peers, teachers, and the dynamics of school interactions. This is due largely to the recognition of many school psychologists that one of their major professional requests is to determine the social and emotional status of referred students (Eklund, Huebner, Groman, & Michael, 1980; Fuller & Goh, 1983; Yakovich, 1983). Due to the limited number of measures available for social-emotional assessment, projective drawings appear to be favored by school psychologists (Prout, 1983) and used more extensively than objective measures (Goh, Teslow, & Fuller, 1981).

Prout and Phillip's (1974) KSD was an outgrowth of Burns and Kaufman's (1970) Kinetic Family Drawing technique (KFD), and, due to its historical and conceptual similarity, is considered a school analogue to the KFD (Knoff & Prout, 1985). Where the KFD attempts to assess a child's position and relationship within the family, the KSD attempts to assess a child's perception of his/her school situation and relative status within the school environment.

The KSD is typically quick and easy to administer. The child is presented with a blank sheet of 8.5 x 11 inch paper, pencil and eraser, and is requested to "Draw a school picture. Put yourself, your teacher, and a friend or two in the picture. Make everyone doing something. Try to draw whole people and make the best drawing you can. Remember, draw yourself, your teacher, and a friend or two and make everyone doing something." After the drawing is completed, the examiner records the order of figures drawn, names and actions of various figures, questioning the child for clarification whenever necessary. To date, interpretation parallels that outlined by Burns and Kaufman for the KFD procedure (1970, 1972). Both techniques have recently been integrated into a Kinetic Drawing System (Knoff & Prout, 1985) for analysis with respect to action, style, and symbols in both the home and school setting.

RESEARCH ON SCHOOL DRAWINGS

Since the inception of the KSD, there have been only two reported studies that have researched its effectiveness. Schneider (1977) conducted a validation study of the KSD
