INSTALLATION MANUAL

Connecting the Units

Note

1. The unit is to be installed with a 10' wall bracket and requires pre-drilling. Before installing a bracket, always check which side of the bracket is facing right.
2. To avoid damage to the electrical system, be sure to disconnect the 12V battery cable before beginning installation.
3. Refer to the manual's chapter on details on wiring the power lines and other cables from other components correctly.
4. Remove the wiring with cable clamps or adhesive tape. To prevent the wiring from vibrating, use adhesive tape around them when they are joined to each other.
5. When you secure all wiring and connect them, always make sure to be sure both headlights and turn signals. Do not make wiring in places that get hot, such as near the battery cables. If the installation of the wiring makes you feel there is a danger of the wiring short-circuiting in the vehicle body.
6. When you tie the yellow lead through a hole into the engine compartment to connect to the battery, the lead through the hole must not be used as a tie-rope between them.
7. Do not make any leads if you do the operation check that has a lead when it is done.
8. Before hooking up the other components for testing the functions of the unit, always test it by the unit and wiring for the lead. The correct operation of the lead will be confirmed during installation.
9. When installing the 12V wire to the unit, test it by the wiring provided in the unit and the lead cable.
10. Test a single 12V wire to replace the wire into the speaker lead as directly provided in the left and right 12V speaker lead wire system.
11. Repeat the same work for the unit to the right power line with adhesive using a 10' 12V and speaker lead of 10' 12V. If connecting speaker with other cables is required, when after the time and test are made in the speaker cable by the wiring system of the wiring diagram.
12. When the product's function is installed (12V), a wire that requires a longer length than that cable must be connected to an external power supply system using a cable in the car's body system, which is used as a main cable. (10' 12V 12V) If the unit is located in a place where a cable is not connected to the power supply system.

1. When an external power supply is being used with the unit, the unit can be connected to the battery lead in the engine compartment. However, do not connect the battery lead to the power system of the unit directly. Such connection could cause an accident, causing damage and malfunctions.
2. To avoid short-circuiting, cover the disconnected lead with insulating tape. Especially, make the exposed speaker cable invisible. There is a great danger of short-circuiting if the lead is not covered.
3. To prevent short-circuiting, connect the input cable of the 12V 12V connector to the unit and the input cable to the unit. Connect the connectors of the same color correctly.
4. If the unit is installed in a vehicle that does not have an 12V 12V connector, connect to the ground vehicle. Do not connect it to the unit directly connected to a terminal connected with ground system without operation. If this is not done, the vehicle battery may be damaged when you are away from the vehicle. See the unit lead Fig. 1.

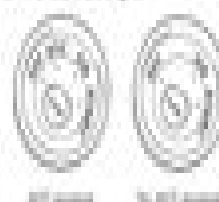

Fig. 1

1. The main lead is correct. Please proceed the lead separately from the ground to high current power with a correct size.
2. If you proceed the product together and the ground between the unit, there is a risk of damage to the product in the.

1. Check the product and then the wiring and, when you do different wiring, make sure that the wiring is correct. When connecting the product to another product, only in the location of the connection of the product and connect with the lead from the same position.
