**Computer Systems Design and Architecture** Vincent P. Heuring, Harry Frederick Jordan, 1997 This text serves as an introduction to and a survey of the common commercial architectures It was created with a strong electrical and computer engineering perspective including current topics such as pipelined processor design memory hierarchy and in *EBOOK: Fundamentals of Digital Logic* Stephen Brown, Zvonko Vranesic, 2008-07-16 Fundamentals of Digital Logic with VHDL Design teaches the basic design techniques for logic circuits The text provides a clear and easily understandable discussion of logic circuit design without the use of unnecessary formalism It emphasizes the synthesis of circuits and explains how circuits are implemented in real chips Fundamental concepts are illustrated by using small examples which are easy to understand Then a modular approach is used to show how larger circuits are designed VHDL is a complex language so it is introduced gradually in the book Each VHDL feature is presented as it becomes pertinent for the circuits being discussed While it includes a discussion of VHDL the book provides thorough coverage of the fundamental concepts of logic circuit design independent of the use of VHDL and CAD tools A CD ROM containing all of the VHDL design examples used in the book as well Altera's Quartus II CAD software is included free with every text

**Use of Services for Family Planning and Infertility, United States, 1982** Gerry E. Hendershot, Marjorie C. Horn, William D. Mosher, 1988 The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth NSFG conducted by the National Center for Health Statistics Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44 A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date Overall 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years There were no statistically significant differences between white 79% black 75% or Hispanic 77% wives or between the 2 income groups The 1982 survey questions were more comprehensive than those of earlier cycles of the survey The annual rate of visits for family planning services in 1982 was 1077 visits 1000 women Teenagers had the highest annual visit rate 1581 1000 of any age group for all sources of family planning services combined Visit rates declined sharply with age from 1447 at ages 15-24 to 479 at ages 35-44 Similar declines with age also were found in the visit rates for white and black women separately Nevertheless the annual visit rate for black women 1334 1000 was significantly higher than that for white women 1033 The highest overall visit rate was for black women 15-19 years of age 1867 1000 Nearly 2/3 of all family planning visits were to private medical sources Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources as did black women age 15-24 White women age 20 and older had higher visit rates to private medical services than to clinics Never married women had higher visit rates to clinics than currently or formerly married women Data were also

collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview During the 3 years before interview about 1.9 million women had infertility visits For all ever married women as well as for white and black women separately infertility services were more likely to be secured from private medical sources than from clinics The survey design reliability of the estimates and the terms used are explained in the technical notes **The DSP Handbook**
