From GCSEs to EBCs Great Britain. Parliament. House of Commons. Education Committee, 2013 The Government's plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government's plans The report also questions how well the Government's proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals

Resources in Education, 1999-10. Teaching Children Mathematics, 1997. *Reforming Lessons: Why English Schools Have Improved Since 2010 and How This Was Achieved* Nick Gibb, Robert Peal, 2025-08-18. *Reforming Lessons* provides a first-hand account of the ambitious programme of reform that has led to a transformation in English schools since 2010 and seen pupils rise through the ranks of international comparison tests such as PIRLS and PISA. Co-authored by former Schools Minister Nick Gibb and Headteacher Robert Peal, the book explores the key principles behind the reforms and reveals the impact they had on school leadership, accountability, teaching methods, curriculum design, and pupil behaviour. Addressing the long legacy of progressive approaches to teaching in English schools and the development of evidence-led alternatives, the book shows that approaches to education such as warm, strict teacher-led instruction and knowledge-rich curriculum have been simultaneously both controversial and hugely successful. Chapters cover Reforms to the primary curriculum, phonics and mathematical mastery, The return of rigour in the secondary curriculum, School structures, academies and free schools, Academic standards, Grassroot reforms, Changes to teacher training and the introduction of the Early Career Framework. Providing a fascinating insight into the major reforms that have shaped England's school system and the drivers behind them, this is essential reading for anyone working in the education sector, policy makers, and those interested in education reform. *Handbook of Classroom Assessment* Gary D. Phye, 1996-11-19. The *Handbook of Classroom Assessment* takes a multi-dimensional approach to classroom assessment. A successful combination of theory and practice, the book emphasizes the assessment of classroom learning within content areas and the development of standards for evaluation. Most chapters are devoted to the assessment of learning and achievement and discuss current theories. The book also features assessment of academic self-concept and subjective well-being in children and adolescents. The Handbook provides successfully field-tested examples of assessment techniques and strategies within the content areas of mathematics, social studies, foreign languages, and the visual arts. Contributing chapter authors share the unique distinction of having backgrounds that include both the development of assessment theory and first-hand experience translating theory into practice at the classroom, school, state, or national level. The book is divided into four sections. Section I discusses the top five theories with respect to what learning is, how it is related to achievement, and how we assess both in the classroom setting. Section II on standardized assessment briefly covers all major standardized achievement tests used in preschool, K-6 and 7-12. Assessment of classroom learning. Section III presents test instruments and techniques specific to the measurement of math skills, social science skills, and artistic talent across ages and grades. Section IV on classroom practices includes an assessment of general reasoning skills and
