MEDICAL TERMINOLOGY THE BASICS

FOUNDATION OF MEDICAL WORDS

A. Structure

Most medical words are composed of two or more terms. To define a medical word:

- divide the word into its terms
- analyze the terms
- define the word

Examples:

Pericarditis

peri = around; *card* = heart; *itis* = inflammation
Inflammation around the heart

Oncology

onc = tumor, mass; *logy* = study of
Study of tumors

B. Terms

Term + Term (____ + ____) = medical word

There are five categories of terms:

1. **Prefix** - beginning of a word
(*rec*, *pre*, ____ , *post* ____)

Designated by a "____" after the term.

2. **Suffix** - ending of a word
(*rec*, ____ , *stomy*, ____ , *itis*)

Designated by a "____" before the term.

3. **Root** - foundation/base of a word
(*rec*, ____ , *Append*, *gastro*)

4. **Combining vowel** - vowel (usually "o") added to a root (*rec*, ____ , *gastro*)

Use a combining vowel when joining:

- a. Root to another root (*rec*, ____ , *gastrodermatitis*)
- b. Root to a suffix, beginning with a consonant (*rec*, ____ , *cardiomyopathy*)

5. **Combining form** - root + vowel
(*rec*, ____ , *Appendic*, *gastroic*)

Designated by a "____" between the root and the vowel

Examples:

Hypertrochocystitis

hyper (prefix) = excessive

trach (combining form) = white

cyst (root) = cell

itis (suffix) = condition of

Definition: condition of excessive white blood cells (leukocytes)

Hematotoxic

hema (combining form) = blood

tox (root) = poison

ic (suffix) = pertaining to

Definition: pertaining to blood poisoning

TIPS:

1. Some terms have more than one definition. To determine the correct definition in a particular medical word, analyze the other terms in the word.

Example: Poliomyelitis

polio = gray (matter)

myel = spinal cord, bone marrow

itis = inflammation

Definition: Inflammation of the gray matter of the spinal cord. The bone marrow does not have gray matter.

2. Some terms may function as a root/combining form in one word and a suffix in another word. Classification depends upon the specific medical word.

Examples: Cytology

cyt (combining form) = cell

logy (suffix) = study of

Definition: Study of cells

Erythrocyte

erythr (combining form) = red

cyte (suffix) = cell

Definition: Red blood cell

While all the terminology may seem frightening and complicated, there are some benefits to learning what certain terms refer to. Educating yourself on what certain medical terms mean can go a long way to helping you address concerns with your doctor. You will no longer be in the dark about what you are being prescribed, and you can more comfortably look over any paperwork about your health, giving you the advantage when it comes working out a plan with your doctor that you feel comfortable with. **Medical Terminology: Brain (Speedy Study Guides)** Speedy Publishing, 2014-07-17 The human brain is a complex organ that has a lot of different parts to it. This means that it can be very difficult for a student to memorize all of the parts of it for an exam. One way to make this easier is with the use of a study pamphlet. This pamphlet has a detailed listing of the names of the major regions and parts of the brain where they are located and the basic functions of them. **Medical Terminology: Heart (Speedy Study Guides)** Speedy Publishing, 2014-07-17 The heart is made of only a few parts, but they are vital to the operation of the organ. A pamphlet can help a student learn about the ventricles, valves, arteries, and other components in this vital part of the body. There are pictures of the different valves as well as the chambers that the student can learn about. Colors are sometimes used to give details about which way the blood flows into and out of the heart so that students can get a better idea of the circulation. *Common Medical Terminology (Blokehead Easy Study Guide)* Scott Green, 2015-06-10 A medical term consists of different elements that are important in accurately describing or identifying the extent, duration, location, or etiology of a terminology.
