- ST instructed pt in communication, as compensatory speech strategy. Pt was able to self-monitor and demonstrate trained speech a 75% accuracy. Ongoing training required.

Collaboration

- Treatment results communicated with family, IDT, Linguaphon representation, SLP for appropriate AAC device.
- Collaborated with OT to discuss appropriate adaptive equipment to learn to use via AAC device.

Therapy Necessity

- Patient presents with mild-to-moderate expressive-receptive language impairment characterized by *****. Pt requires ongoing ST to address speech language impairments to facilitate successful expression, improve language function in order to enhance the patient's quality of life by improving ability to communicate basic needs/needs, communicate pain, communicate medical needs, improve expressive communication, improve functional communication skills and allow for increased socialization.
- Therapy necessary to increase speech intelligibility; participate in meaningful conversations, achieve adequate expressive speech skills to facilitate independence in the home environment, return to FLOP.
- Without the therapy patient at risk for decreased social and functional communication, reduced quality of life.
- Skilled ST and training of AAC is necessary as it is reasonably expected to, reduce or ameliorate the expressive-receptive language deficits of pt's disability. Pt is unable to communicate verbally because she is bed bound, the ability to communicate is essential for social and functional interactions, as well as promoting independence. Lack of communication can lead to isolation and social isolation, that is why when communication is impaired, it affects every aspect of a person's life and the individual is at risk medically as they are not able to express health concerns or report abuse.
- Skilled ST is necessary to promote independence and function via communication.
