Fundamental Challenges to Global Peace and Security Hoda Mahmoudi, Michael H. Allen, Kate Seaman, 2022-02-04

This book challenges the current thinking and strategies in the field of global peace and security. It is clear that current global public and private institutions are inadequate for the challenges we face today. These challenges cut across borders and require a more coordinated and concerted effort to find workable solutions. This book therefore begins with the question of global leadership and works its way back to the interconnected dynamics of global modernity and conflict. It is divided into four parts each addressing a fundamental challenge to global peace and security. By exploring how we break out of the current framework in which we understand global activities and the distribution of resources and this book provides new ways of understanding the material, cultural, political and spiritual relations that form the basis of international society.

Computer Science and Engineering—Theory and Applications Mauricio A. Sanchez, Leocundo Aguilar, Manuel Castañón-Puga, Antonio Rodríguez-Díaz, 2018-02-05 This book presents a collection of research findings and proposals on computer science and computer engineering introducing readers to essential concepts, theories and applications.
