Climate Change and Mango Production Syed Atif Hasan Naqvi, Shakeel Ahmad, Mukhtar Ahmed, 2025-07-26 The significance of the climate change and their impacts on fruit crops their problems and their solutions determine the need for a book in agriculture So firstly we are going to talk about the importance of climate change and the shift of the climate due to various reasons Similarly king of fruits mango is also facing various issues due to climate change and the most important problems which are causing serious constraints to mango production are Mango sudden decline and mango malformation

These problems have emerged in orchards since the issue of climate change is increasing day by day and currently there is no mango orchard free from these diseases and leading to very low production of the crop with respect to previous years. Similarly, climate change has also raised the issue of unseen pathogens in the mango orchards posing serious challenges to mango production due to new diseases and stresses. The main drivers behind the writing of this book is that this book will disseminate a plethora of knowledge on how to deal smartly with the mango orchards in changing climate to obtain good yield and to maintain good health status.

Emulsion-based Systems for Delivery of Food Active Compounds Shahin Roohinejad, Ralf Greiner, Indrawati Oey, Jingyuan Wen, 2018-04-03. A comprehensive text that offers a review of the delivery of food active compounds through emulsion based systems. *Emulsion based Systems for Delivery of Food Active Compounds* is a comprehensive recourse that reviews the principles of emulsion based systems formation, examines their characterization and explores their effective application as carriers for delivery of food active ingredients. The text also includes information on emulsion based systems in regards to digestibility and health and safety challenges for use in food systems. Each chapter reviews specific emulsion based systems: Pickering multiple multilayered solid lipid nanoparticles, nanostructured lipid carriers and more, and explains their application for delivery of food active compounds used in food systems. In addition, the authors noted experts in the field review the biological fate, bioavailability and the health and safety challenges of using emulsion based systems as carriers for delivery of food active compounds in food systems. This important resource offers a comprehensive text that includes detailed coverage of emulsion based systems for the delivery of food active compounds. Presents the most recent development in emulsion based systems that are among the most widely used delivery systems developed to control the release of food active compounds. Includes a guide for industrial applications for example food and drug delivery is a key concern for the food and pharmaceutical industries. *Emulsion based Systems for Delivery of Food Active Compounds* is designed for food scientists as well as those working in the food nutraceutical and pharmaceutical and beverage industries. The text offers a comprehensive review of the essential elements of emulsion based systems for delivery of food active compounds.

Keratin-based Materials Narendra Reddy, Wenlong Zhou, Mingbo Ma, 2020-08-24. The book introduces readers to the unique aspects of keratin and opportunities to develop various bioproducts and biomaterials from keratins. It discusses the structure, properties and specific applications of keratins extracted from different sources. Applications include keratins as absorbents, reinforcements or matrices for composites, hydrogels and fibres.
