

HYDRAULIC SYSTEM

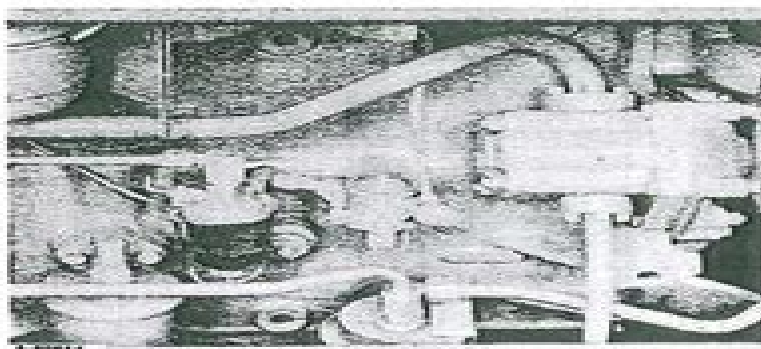

Illustr. 25
Front mounted 17 g.p.m. hydraulic pump.

The basic hydraulic system provides "live" hydraulic power to the power steering system at all operating speeds. It also guarantees lubrication of the drive bevel gear and differential assembly by return flow to the rear frame, which also serves as the hydraulic reservoir.

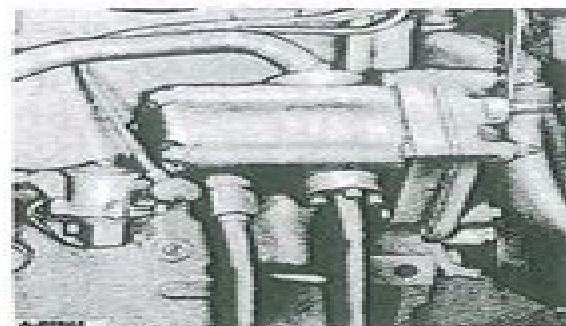

The hydraulic system is composed of a 17 g.p.m. (gallons per minute) (at rated engine speed) front mounted pump, an engine mounted pump, two open-center loader control valves and cylinders, a hydrostatic steering cylinder with flow divider and controls, a reservoir (combination transmission case and reservoir), and various hoses and tubes.

The 17 g.p.m. pump (Illustr. 25) furnishes power for the loader cylinders through the loader control valves.

Illustr. 25A
Engine driven 9 g.p.m. hydraulic pump.

The engine mounted pump on loader tractors without three-point hitch is a 9 g.p.m. pump (Illustr. 25A) that furnishes fluid to the steering cylinder through the flow divider.

Illustr. 25B
Tandem pump used with three-point hitch.

The engine mounted pump on loader tractors with three-point hitch is a tandem pump, that is, two pumps mounted back-to-back. The 7 g.p.m. pump furnishes power for the three-point hitch and the 5 g.p.m. pump furnishes power for the steering. See Illustr. 25B.

Use fluid that has been stored in clean containers. Wipe away all grease and dirt before removing filler caps, plugs, or other parts requiring service. Plug all open ports so that dirt cannot enter as dirt is injurious to the pumps and valves. Wash all parts to be reassembled thoroughly in solvent.

If it becomes necessary to install O-rings, the installation of them is very critical. Therefore, exercise care when installing them. Prior to installation, dip the O-rings in IH Hy-Tran fluid. Be certain that the ring grooves or bores are free of chips and dirt. O-rings that show a defect or scratch should not be used.

For readjustment or servicing of the pumps, boom and bucket control valves, flow divider valve, hydrostatic steering pilot valve and cylinders, it is recommended that you see your International Harvester dealer since special equipment and instructions are required.
