Game Theory and the Humanities Steven J. Brams, 2012-08-24 How game theory can offer insights into literary historical and philosophical texts ranging from Macbeth to Supreme Court decisions Game theory models are ubiquitous in economics common in political science and increasingly used in psychology and sociology in evolutionary biology they offer compelling explanations for competition in nature But game theory has been only sporadically applied to the humanities indeed we almost never associate mathematical calculations of strategic choice with the worlds of literature history and philosophy And yet as Steven Brams shows game theory can illuminate the rational choices made by characters in texts ranging from the Bible to Joseph Heller's Catch 22 and can explicate strategic questions in law history and philosophy Much of Brams's analysis is based on the theory of moves TOM which is grounded in game theory and which he develops gradually and applies systematically throughout TOM illuminates the dynamics of player choices including their misperceptions deceptions and uses of different kinds of power Brams examines such topics as the outcome and payoff matrix of Pascal's wager on the existence of God the strategic games played by presidents and Supreme Court justices and how information was slowly uncovered in the game played by Hamlet and Claudius The reader gains not just new insights into the actions of certain literary and historical characters but also a larger strategic perspective on the choices that make us human

Cutrofello, 1994-01-01 Andrew Cutrofello demonstrates that in light of Michel Foucault's genealogical criticisms of the

juridical model of power it is possible to develop a postjuridical model of Kantian critique Recasting game theory's celebrated prisoner's dilemma in Foucauldian terms Cutrofello illuminates the techniques of mutual betrayal that train bodies to reason themselves into complicity with forces of subjugation He shows how a genealogically reformulated version of Kantian ethics can provide the basic parameters of a discipline of resistance to such forces and he argues for a more nuanced assessment of the stakes involved in the demise of philosophy as a disciplinary formation Along the way Cutrofello presents fascinating readings of Kant's own care of the self ethic drawing on the conceptual resources of Gilles Deleuze Jacques Lacan and Luce Irigaray This tour de force will prompt social theorists to reconsider the way power functions in our modern postmodern world

Faith and Force David L. Clough, Brian Stiltner, 2007-06-04 This book began in an argument between friends surprised to find themselves on opposite sides of the debate about whether the United States and the United Kingdom should invade Iraq in 2003 Situated on opposite sides of the Atlantic in different churches and on different sides of the just war pacifist fence we exchanged long emails that rehearsed on a small scale the great national and international debates that were taking place around us We discovered the common ground we shared as well as some predictable and some surprising points of difference When the initial hostilities ended our conversation continued and we felt the urgency of contributing to a wider Christian debate about whether and when war could be justified From the Preface So began a dynamic collaboration that developed into a civil but provocative debate over matters of war and peace that is Faith and Force From the ancient battles between Greek city states to the Crusades to the World Wars of the twentieth century to the present day wars in Afghanistan and Iraq and the Middle East aggressors and defenders alike have claimed the mantle of righteousness and termed their actions just But can the carnage of war ever be morally grounded And if so how These are the questions that David L Clough a Methodist proponent of pacifism and Brian Stiltner a Catholic theologian and just war adherent have vowed to answer together With one voice Clough and Stiltner outline and clarify issues of humanitarian intervention weapons proliferation and preventative war against rogue states Their writing is grounded in Christian tradition and provides a fresh and illuminating account of the complexities and nuances of the pacifist and just war positions In each chapter Clough and Stiltner engage in debate on the issues demonstrating a respectful exchange of ideas absent in much

contemporary political discourse whether on television or in the classroom The result is a well reasoned challenging repartee that searches for common ground within the Christian tradition and on behalf of the faithful promotion of justice yet one that also recognizes genuine differences that cannot be bridged easily Intended for a broad audience Faith and Force is the perfect foil to the shrill screeching that surrounds partisan perspectives on military power and its use To help with using the book in a classroom context the authors have provided Questions for Reflection and Discussion for each chapter You can download these questions in PDF format at press.georgetown.edu Bulletin of the Atomic Scientists, 1971-05 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

creating imaginary worlds different from the world we know yet invaluable to our understanding of it Of Literature and Knowledge is a noteworthy challenge to contemporary critical theory arguing that by bridging the gap between literature and science we might not only reinvigorate literary studies but above all further our understanding of literature
