

Document 2: In 1992, Pope John Paul II issued an encyclical on behalf of the Catholic Church, reaffirming its position on the scientific accuracy of evolution and its view on the historical nature of history's greatest scientific discovery.

During his visit to the Vatican, Pope John Paul II acknowledged in a speech today that the Roman Catholic Church had erred in condemning Galileo over 300 years ago. He admitted that the Church could see around the Sun.

The address by the Pope before the Pontifical Academy of Sciences closed a 35-year investigation into the Church's condemnation of Galileo in 1633, one of history's most infamous collisions between faith and science. Galileo was forced to recant his astronomical findings to avoid being burned at the stake and spent the remaining eight years of his life under house arrest.

John Paul said the theologians who condemned Galileo did not recognize the formal distinction between the Bible and its interpretation.

This led them unduly to transpose into the realm of the doctrine of the faith, questions which in fact pertained to scientific investigations.

Though the Pope acknowledged that the Church had done Galileo a wrong, he said the 17th-century theologians were working with the knowledge available to them at the time.

Question 3:

Using Document 2, what was Pope John Paul II's main message according to this 1992 newspaper article? Pope John Paul II is trying to rectify the past wrongs of the Catholic Church in respect to Galileo's trial and condemnations. He states that Galileo was correct about heliocentricity and recognizes the error of the Catholic Church over 300 years earlier. He attempts to justify the actions of the Church based on the fact that theologians of the 1600s were "working with the knowledge available to them at the time."

Rubric Nation Michelle

Tenam-Zemach, Joseph E. Flynn, 2015-04-01 What is a rubric and how are they being used in teacher education and evaluation When did rubrics become ubiquitous in the field of education What impact do rubrics have on students teachers teacher educators and the educational enterprise This book is an edited volume of essays that critically examine the phenomenon of rubrics in teacher education evaluation and education more broadly Rubrics have seen a dramatic rise in use and presence over the past twenty five years in colleges of education and districts across the country Although there is a wealth of literature about how to make rubrics there is scant literature that explores the strengths and weaknesses of rubrics and the impact the rubric phenomenon is having in reshaping education The chapters included in this edited volume will critically reflect on the contemporary contexts of rubrics and the uses and impact of rubrics in education Since rubrics have become indelible in education it is necessary for a fuller nuanced discussion of the phenomenon Creating a book that explores these aspects of rubrics is timely and fundamental to expanding the discourse on this ubiquitous evaluation tool This book is not meant to be a series of chapters dedicated to best practices for creating rubrics nor is this text meant to present all sides of the rubric discussion Rather this text intends to offer critical polemics about rubrics that can spur greater critical discussion about a phenomenon in education that has largely been unquestioned in the literature Self-Healing and Self-Recovering Systems under the Spatial Grasp Model Peter Simon Sapaty, 2025-07-03 Perfect for system scientists application programmers industry managers defence and security commanders emergency agencies university students philosophers and psychologists too *Nazis in the New World* Aaron Gillette, 2025-05-27 The incredible story of Nazi German exchange students in the United States during WWII In the 1930s international exchange students in the United States celebrated their Christmas breaks in Florida enthusiastically engaged in college aged antics rowdy parties and the defiance of authorities In between such mayhem they admired the beauty of America quietly discussed their impressions of their host country and agonized over their future which would now be reshaped by their study abroad experiences These were not typical international college students however These students were Nazis In *Nazis in the New World* Aaron Gillette reveals the unknown history of Nazi German exchange students sent to America in the 1930s After receiving the Gestapo's stamp of approval they were instructed to use their charm and charisma to promote the Third Reich Some also served Hitler as covert operatives against the United States In many cases the Nazi government came to regret sending its students across the ocean Gillette argues that Nazism was an abject failure in the United States that antisemitism was on the decline that German espionage in America was a disaster for the Reich and that FDR and J Edgar Hoover brilliantly manipulated Nazi blunders to propel America into the war against Hitler and to empower the FBI Meanwhile numerous German exchange students in the United States were transformed from Nazis into fiercely patriotic Americans **The Phenomenon of Obama and the Agenda for Education - 2nd Edition** Paul R. Carr, Brad J. Porfilio, 2015-02-01 Anyone who is touched by public education teachers administrators teacher educators students parents politicians pundits and citizens ought to read

this book a revamped and updated second edition It will speak to educators policymakers and citizens who are concerned about the future of education and its relation to a robust participatory democracy The perspectives offered by a wonderfully diverse collection of contributors provide a glimpse into the complex multilayered factors that shape and are shaped by education institutions today The analyses presented in this text are critical of how globalization and neoliberalism exert increasing levels of control over the public institutions meant to support the common good Readers of this book will be well prepared to participate in the dialogue that will influence the future of public education in United States and beyond a dialogue that must seek the kind of change that represents hope for all students As for the question contained in the title of the book The Phenomenon of Obama and the Agenda for Education Can Hope Still Audaciously Trump Neoliberalism Second Edition Carr and Porfilio develop a framework that integrates the work of the contributors including Christine Sleeter and Dennis Carlson who wrote the original forward and afterword respectively and the updated ones written by Paul Street Peter McLaren and Dennis Carlson which problematize how the Obama administration has presented an extremely constrained conservative notion of change in and through education The rhetoric has not been matched by meaningful tangible transformative proposals policies and programs aimed at transformative change and now fully into a second mandate this second edition of the book is able to more substantively provide a vigorous critique of the contemporary educational and political landscape There are many reasons for this and according to the contributors to this book it is clear that neoliberalism is a major obstacle to stimulating the hope that so many have been hoping for Addressing systemic inequities embedded within neoliberalism Carr and Porfilio argue is key to achieving the hope so brilliantly presented by Obama during the campaign that brought him to the presidency

Atlas of Material Worlds Matthew Seibert, 2021-08-17 Atlas of Material Worlds is a highly designed narrative atlas illustrating the agency of nonliving materials with unique ubiquitous and often hidden influence on our daily lives Employing new materialism as a jumping off point it examines the increasingly blurry lines between the organic and inorganic engaging the following questions What roles do nonliving materials play Might a closer examination of those roles reveal an undeniable agency we have long overlooked or disregarded If so does this material agency change our understanding of the social structures ecologies economies cosmologies technologies and landscapes that surround us And perhaps most importantly why does material agency matter This is the story of the world s driest nonpolar desert pink flamingos and cerulean blue lithium ponds industrial shipping logistics pudding like jiggling substrates and monuments of mud galactic bodies radioactive sheep and the yellowcake of uranium Put simply this book dares readers to see the world anew from material up Atlas of Material Worlds offers this new relationship to our host environment in a time of mounting crises accelerating climate change ballooning socioeconomic inequality and rising toxic nationalism uniquely telling materialist stories for practitioners and students in landscape architecture and other built environment disciplines
