globalization RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally. Given these developments, the time is right for a book series that draws together diverse scholarship in global studies. This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field. The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology, anthropology, history, media and cultural studies, economics and governance, environmental sustainability, international law and criminal justice. Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core global concerns of narrative, praxis, space and place. This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century.

Iran's Rocket and Missile Forces and Strategic Options Anthony H. Cordesman, 2015-01-23 Iran's rocket and missile forces serve a wide range of Iranian strategic objectives. These forces range from relatively short-range artillery rockets that support its ground forces and limit the need for close air support to long-range missiles that can reach any target in the region and the development of booster systems that might give Iran the ability to strike at targets throughout Europe and even in the United States. Iran's forces and systems are steadily evolving. While the lethality of most current systems is limited by a reliance on conventional warheads, poor accuracy and uncertain reliability, Iran is developing steadily.

Proxy Wars Eli Berman, David A. Lake, 2019-03-15 The most common image of world politics involves states negotiating cooperating or sometimes fighting with one another billiard balls in motion on a global pool table Yet working through local proxies or agents through what Eli Berman and David A Lake call a strategy of indirect control has always been a central tool of foreign policy Understanding how countries motivate local allies to act in sometimes costly ways and when and how that strategy succeeds is essential to effective foreign policy in today's world In this splendid collection Berman and Lake apply a variant of principal agent theory in which the alignment of interests or objectives between a powerful state and a local proxy is central Through analysis of nine detailed cases *Proxy Wars* finds that when principals use rewards and punishments tailored to the agent's domestic politics proxies typically comply with their wishes when the threat to the principal or the costs to the agent increase the principal responds with higher powered incentives and the proxy responds with greater effort if interests diverge too much the principal must either take direct action or admit that indirect control is unworkable Covering events from Denmark under the Nazis to the Korean War to contemporary Afghanistan and much in between the chapters in *Proxy Wars* engage many disciplines and will suit classes taught in political science economics international relations security studies and much more
