traditional testing are no longer adequate to equip our students with the skills they need to excel in the global economy. Instead, teachers need to engage students in deeper learning, assessing their ability to use higher-order skills. Skills like synthesizing information, understanding evidence, and critical problem solving are not achieved when we teach to multiple-choice exams. Examples in *Beyond the Bubble Test* paint a useful picture of how schools can begin to supplement traditional tests with something that works better. This book provides new perspectives on current performance assessment research, plus an incisive look at what's possible at the local and state levels. Linda Darling-Hammond, with a team of leading scholars, brings together lessons learned, new directions, and solid recommendations into a single, readily accessible compendium. *Beyond the Bubble Test* situates the current debate on performance assessment within the context of testing in the United States. This comprehensive resource also looks beyond our U.S. borders to Singapore, Hong Kong, and other places whose reform-mindedness can serve as an example to us.
