Whose America? Jonathan Zimmerman, 2022-08-26 In this expanded edition of his 2002 book Zimmerman surveys how battles over public education have become conflicts at the heart of American national identity Critical Race Theory The 1619 Project Mask mandates As the headlines remind us American public education is still wracked by culture wars But these conflicts have shifted sharply over the past two decades marking larger changes in the ways that Americans imagine themselves In his 2002 book *Whose America* Zimmerman predicted that religious differences would continue to dominate the culture wars Twenty years after that seminal work Zimmerman has reconsidered arguments over what American history is what it means and how it is taught have exploded with special force in recent years In this substantially expanded new edition Zimmerman meditates on the history of the culture wars in the classroom and on what our inability to find common ground might mean for our future

Sport and the Home Front Matthew Taylor, 2020-05-31 *Sport and the Home Front* contributes in significant and original ways to our understanding of the social and cultural history of the Second World War It explores the complex and contested treatment of sport in government policy media representations and

the everyday lives of wartime citizens Acknowledged as a core component of British culture sport was also frequently criticised marginalised and downplayed existing in a constant state of tension between notions of normality and exceptionality routine and disruption the everyday and the extraordinary The author argues that sport played an important yet hitherto neglected role in maintaining the morale of the British people and providing a reassuring sense of familiarity at a time of mass anxiety and threat Through the conflict sport became increasingly regarded as characteristic of Britishness a symbol of the ordinary everyday lives in defence of which the war was being fought Utilised to support the welfare of war workers the entertainment of service personnel at home and abroad and the character formation of schoolchildren and young citizens sport permeated wartime culture contributing to new ways in which the British imagined the past present and future Using a wide range of personal and public records from diary writing and club minute books to government archives this book breaks new ground in both the history of the British home front and the history of sport

Tiger Check Steven A. Fino, 2017-11 The fielding of automated flight controls and weapons systems in fighter aircraft from 1950 to 1980 challenged the significance ascribed to several of the pilots historical skillsets such as superb hand eye coordination required for aggressive stick and rudder maneuvering and perfect eyesight and crack marksmanship required for long range visual detection and destruction of the enemy Highly automated systems would proponents argued simplify the pilot s tasks while increasing his lethality in the air thereby opening fighter aviation to broader segments of the population However these new systems often required new unique skills which the pilots struggled to identify and develop Moreover the challenges that accompanied these technologies were not restricted to individual fighter cockpits but rather extended across the pilots tactical formations altering the social norms that had governed the fighter pilot profession since its establishment In the end the skills that made a fighter pilot great in 1980 bore little resemblance to those of even thirty years prior despite the precepts embedded within the myth of the fighter pilot As such this history illuminates the rich interaction between human and machine that often accompanies automation in the workplace It is broadly applicable to other enterprises confronting increased automation from remotely piloted aviation to Google cars It should appeal to those interested in the history of technology and automation as well as the general population of military aviation enthusiasts Provided by publisher

Work and Livelihoods Susana Narotzky, Victoria Goddard, 2016-12-01 Winner of the Society for the Anthropology of Work book prize 2017 This volume

presents a global range of ethnographic case studies to explore the ways in which in the context of the restructuring of industrial work the ongoing financial crisis and the surge in unemployment and precarious employment local and global actors engage with complex social processes and devise ideological political and economic responses to them It shows how the reorganization and re signification of work notably shifts in the perception and valorization of work affect domestic and community arrangements and shape the conditions of life of workers and their families Asia's Reckoning Richard McGregor,2018-12-04 A Financial Times Best Book of 2017 A shrewd and knowing book Robert D Kaplan The Wall Street Journal A compelling and impressive read The Economist Skillfully crafted and well argued Jeffrey Wasserstrom Financial Times An excellent modern history provides the context needed to make sense of the region s present and future Joyce Lau South China Morning Post A history of the combative military diplomatic and economic relations among China Japan and the United States since the 1970s and the potential crisis that awaits them Richard McGregor s Asia s Reckoning is a compelling account of the widening geopolitical cracks in a region that has flourished under an American security umbrella for more than half a century The toxic rivalry between China and Japan two Asian giants consumed with endless history wars and ruled by entrenched political dynasties is threatening to upend the peace underwritten by Pax Americana since World War II Combined with Donald Trump s disdain for America s old alliances and China s own regional ambitions east Asia is entering a new era of instability and conflict If the United States laid the postwar foundations for modern Asia now the anchor of the global economy Asia s Reckoning reveals how that structure is falling apart With unrivaled access to archives in the United States and Asia as well as to many of the major players in all three countries Richard McGregor has written a tale that blends the tectonic shifts in diplomacy with bitter domestic politics and the personalities driving them It is a story not only of an overstretched America but also of the rise and fall and rise of the great powers of Asia The about turn of Japan from a colossus seemingly poised for world domination to a nation in inexorable decline in the space of two decades has few parallels in modern history as does the rapid rise of China a country whose military is now larger than those of Japan South Korea Taiwan and southeast Asia s combined The confrontational course on which China and Japan are set is no simple spat between neighbors the United States would be involved on the side of Japan in any military conflict between the two countries The fallout would be an economic tsunami affecting manufacturing centers trade routes and political capitals on every continent Richard McGregor s book takes us behind the headlines of his years reporting as the Financial Times s Beijing and Washington bureau chief to show how American power will stand or fall on its ability to hold its ground in Asia

episodes in the global history of the modern built environment the vast public housing programme sponsored by successive Hong Kong governments from the 1950s in a quest to build up the territory into a lasting people's home And unlike many of its counterparts elsewhere this is a programme still ongoing today a case of history in progress as Hong Kong now boasts one of the world's longest lasting public housing programmes During that time it has been not just a mirror of the cultural and economic values of Hong Kong society but also a reflection of more nebulous fast changing perceptions of identity and a testament to the community building achievements of Hongkongers over these years This authoritative study combines architectural history with the broader social political and cultural aspects of housing production particularly the geo political issues of sovereignty and decolonisation that uniquely and fundamentally structured the trajectory of Hong Kong public housing and territory development Exploring the relationship between built form ideology and administrative governance it shows how massive state intervention interacted at times uneasily with Hong Kong's dominant laissez faire ethos to help maintain the legitimacy of successive administrations during an era of auto decolonisation and support an interstitial society suspended between two sovereignties Following more recent political changes Hong Kong's public housing heritage has also become a focus of nostalgic community pride a monumental achievement of home building which this book documents and celebrates for posterity
