

History of the Atom Timeline

John Dalton (1766 – 1844):

John Dalton was an English chemist. His ideas form the atomic theory of matter. Here are his ideas.

- All elements are composed (made up) of atoms. It is impossible to divide or destroy an atom.
- All atoms of the same elements are alike. (One atom of oxygen is like another atom of oxygen.)
- Atoms of different elements are different. (An atom of oxygen is different from an atom of hydrogen.)
- Atoms of different elements combine to form a compound. These atoms have to be in definite whole number ratios. For example, water is a compound made up of 2 atoms of hydrogen and 1 atom of oxygen (a ratio of 2:1). Three atoms of hydrogen and 2 atoms of oxygen cannot combine to make water.

The Answer Within Mary Rose de Angelo,2011-05-19 Happiness is a choice but it does not come to us by copying others Although we may learn much from each other we each have a personal purpose which is the most special and the most important thing we can do By it we define and fulfill our purpose for our Life here in Time When we copy others we are feebly attempting to live their life instead of our own and sometimes miss the mark of our own Becoming The Purpose of our lives can only be discovered by going within our soul and Spirit where we are led to our Beginning and our Connection to All The scars of our fall which led us to living our existence here in time have left us a legacy where we will do everything and anything we can to focus outside ourselves to avoid looking Within Because we feel an all consuming guilt we neglect the very thing that will wash away all the guilt help us discover our personal purpose and bring complete Happiness Health and Joy In my first book *Coming To Be* I try to show how it is necessary for us to erase the scars of our suppressions to become as healthy as we can be on the physical emotional level These scars are the things we were told about ourselves that led to restrictions of our growth because they put many guilt locks on our soul That made us more afraid to go Within So our focus is continually drawn away from discovering our true self No matter how many churches or temples or mosques we build in an attempt to Know God we continually focus on buildings and rites and the faults and errors of others in an attempt to avoid the very thing that will bring us complete Peace Joy and Love In all cultures the prophets that have come to us within the various religions while seeking to lead us to the Truth have told us we must do so The Middle Eastern Mystics spoke of becoming empty the Christian directed us somewhat the same way That is through Jesus and our connection to Him We must go Within to find Him His connection to us DNA as man also bought God to Us in His flesh but His Godhead is Spirit so we must go within to find Him However whenever we were taught a Word by the Prophets we constantly would add to their Word of Truth By adding to the Truth we actually take away from its Essence and change it Truth Lives in the Center of Contradiction That is the very Spirit of God Who lives in the Center of Truth no matter the name we choose to call Him It is One and the Same Our guilt forever takes us away from the Truth by our focus outside ourselves whether it is other religions people buildings or ceremonies things wealth or power Yet the answer to All is to go Within There we discover the Spirit of God waiting to show us who we are

Joint Committee on Atomic Energy,1959 Questions of Socialists and Their Answers William Stephens Kress,1908 **No Easy Answers** Allan Franklin,2005-02-27 In *No Easy Answers* Allan Franklin offers an accurate picture of science to both a general reader and to scholars in the humanities and social sciences who may not have any background in physics Through

the examination of nontechnical case studies he illustrates the various roles that experiment plays in science He uses examples of unquestioned success such as the discoveries of the electron and of three types of neutrino as well as studies that were dead ends wrong turns or just plain mistakes such as the fifth force a proposed modification of Newton's law of gravity Franklin argues that science is a reasonable enterprise that provides us with knowledge of the natural world based on valid experimental evidence and reasoned and critical discussion and he makes clear that it behooves all of us to understand how it works
