Ethical Issues of Human Genetic Databases Bernice Elger, 2016-05-13

Following the boom in population databases in recent years there has been sustained and intense international debate about political processes and legal and ethical issues surrounding the protection and use of genetic data

As a result several national and international organizations and committees have published widely differing guidelines and statements concerning genetic databases and biobanks

Ethical Issues of Human Genetic Databases compares the new area of biobanking with the tradition of ethically accepted classical research and highlights the distinctive features of existing databases and guidelines

The volume identifies areas of consensus and controversy while investigating the challenges posed to classical health research ethics by the existence of genetic databases

analyzing the reasons for such varying guidelines

The book will be essential to academics biobankers policy makers and researchers in the field of medical ethics
