FROM ZERO TO JDBC HERO Vivian Siahaan,Rismon Hasiholan Sianipar,2019-10-01 In this book you will learn how to build from scratch a criminal records management database system using Java SQLite All Java code for digital image processing in this book is Native Java Intentionally not to rely on external libraries so that readers know in detail the process of extracting digital images from scratch in Java In chapter one you will create Bank database and its four tables In chapter two you will learn the basics of cryptography using Java Here you will learn how to write a Java program to count Hash MAC Message Authentication Code store keys in a KeyStore generate PrivateKey and PublicKey encrypt decrypt data and generate and verify digital prints In chapter three you will learn how to create and store salt passwords and verify them You will

create a Login table In this case you will see how to create a Java GUI using NetBeans to implement it In addition to the Login table in this chapter you will also create a Client table In the case of the Client table you will learn how to generate and save public and private keys into a database You will also learn how to encrypt decrypt data and save the results into a database In chapter four you will create an Account table This account table has the following ten fields account_id primary key client_id primarykey account_number account_date account_type plain_balance cipher_balance decipher_balance digital_signature and signature_verification In this case you will learn how to implement generating and verifying digital prints and storing the results into a database In chapter five you will create a Client_Data table which has the following seven fields client_data_id primary key account_id primary_key birth_date address mother_name telephone and photo_path In chapter six you will create Crime database and its six tables In chapter seven you will be taught how to extract image features utilizing BufferedImage class in Java GUI In chapter eight you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In chapter nine you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In chapter ten you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In chapter eleven you will add two tables Victim and File_Case The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The File_Case has seven columns file_case_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables

Learn SQLite with JDBC Vivian Siahaan, Rismon Hasiholan Sianipar, 2019-09-30

In this book you will learn how to build from scratch a criminal records management database system using Java SQLite All Java code for digital image processing in this book is Native Java Intentionally not to rely on external libraries so that readers know in detail the process of extracting digital images from scratch in Java In the first chapter you will be shown how to create SQLite database and tables with Java In second chapter you will be taught how to extract image features utilizing BufferedImage class in Java GUI Digital image techniques to extract image features used in this chapter are grascaling sharpening invertering blurring dilation erosion closing opening

vertical prewitt horizontal prewitt Laplacian horizontal sobel and vertical sobel For readers you can develop it to store other advanced image features based on descriptors such as SIFT and others for developing descriptor based matching In the third chapter you will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In the fourth chapter you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In the fifth chapter you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In the sixth chapter you will add two tables Victim and Case_File The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The Case_File has seven columns case_file_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables Finally this book is hopefully useful for you

Learning MariaDB Vivian Siahaan, Rismon Hasiholan Sianipar, 2019-09-03 In this book you will learn how to build from scratch a criminal records management database system using MariaDB Connector J As you know MariaDB server is a community developed fork of MySQL server Started by core members of the original MySQL team MariaDB actively works with outside developers to deliver the most featureful stable and sanely licensed open SQL server in the industry In the first chapter you will be taught how to create Crime database and its tables In the second chapter you will create Suspect table You will be taught to create Java GUI to view edit insert and delete Suspect table data This table has eleven columns suspect_id primary key suspect_name birth_date case_date report_date suspect_status arrest_date mother_name address telephone and photo In the third chapter you will be taught to create Java GUI to view edit insert and delete Feature_Extraction table data This table has eight columns feature_id primary key suspect_id foreign key feature1 feature2 feature3 feature4 feature5 and feature6 All six fields except keys will have a BLOB data type so that the image of the feature will be directly saved into this table In the fourth chapter you will add two tables Police_Station and Investigator These two tables will later be joined to Suspect table through another table File_Case which will be built in the seventh chapter The Police_Station has six columns police_station_id primary key location city province telephone and photo The Investigator has eight columns investigator_id primary key investigator_name rank

birth_date gender address telephone and photo Here you will design a Java GUI to display edit fill and delete data in both tables In the fifth chapter you will add two tables Victim and File_Case The File_Case table will connect four other tables Suspect Police_Station Investigator and Victim The Victim table has nine columns victim_id primary key victim_name crime_type birth_date crime_date gender address telephone and photo The File_Case has seven columns file_case_id primary key suspect_id foreign key police_station_id foreign key investigator_id foreign key victim_id foreign key status and description Here you will also design a Java GUI to display edit fill and delete data in both tables **AUUGN** ,1998-05

Java Web Development Illuminated Kai Qian,2007 This text introduces students to the concepts of building Web distributed applications and helps develop the necessary skills through numerous examples projects case studies and hands on examples **BOOK JACKET** **Touch of Class** Bertrand Meyer,2009-07-31 This text combines a practical hands on approach to programming with the introduction of sound theoretical support focused on teaching the construction of high quality software A major feature of the book is the use of Design by Contract **Running Linux** Matt Welsh,2003 Welsh s guide has everything users need to understand install and start using the Linux operating system New topics covered include laptops cameras scanners sound multimedia and more **Java Performance Tuning** Jack Shirazi,2003-01-21 Java application performance is tied pretty heavily to the underlying Java Virtual Machine and the new 1.4 version of Java has significant changes that mean previously used performance tips and strategies may no longer work Significantly revised and expanded this second edition not only covers Java 1.4 but adds new coverage of JDBC NIO Servlets EJB and JavaServer Pages Suitable for intermediate and advanced Java developers this text also covers JDBC RMI CORBA Servlets JavaServer Pages and custom tag libraries XML internationalization JavaMail Enterprise JavaBeans and performance tuning It should be a useful resource for teaching how to create a tuning strategy how to use profiling tools to understand a program s behaviour and how to avoid performance penalties from inefficient code making them more efficient and effective The result is code that s robust maintainable and fast **Design Patterns for e-Science** Henry Gardner,Gabriele Manduchi,2007-05-03 This is a book about a code and about coding The code is a case study which has been used to teach courses in e Science at the Australian National University since 2001 Students learn advanced programming skills and techniques TM in the Java language Above all they learn to apply useful object oriented design patterns as they progressively refactor and enhance the software We think our case study EScope is as close to real life as you can get It is a smaller version of a networked graphical waveform browser which is used in the control rooms of fusion energy experiments around the world It is quintessential e Science in the sense of e Science being computer science and information technology in the service of science It is not specifically Grid enabled but we develop it in a way that will facilitate its deployment onto the Grid The standard version of EScope interfaces with a specialised database for waveforms and related data known as MDSplus On the accompanying CD we have provided you with software which will enable you to install MDSplus EScope and sample data files onto Windows or Linux computers There is

much additional software including many versions of the case study as it gets built up and progressively refactored using design patterns There will be a home web site for this book which will contain up to date information about the software and other aspects of the case study

Annual Reviews Of Computational Physics Ix Dietrich Stauffer,2001-04-30 The ninth volume of Annual Reviews of Computational Physics has as a special feature a comprehensive compendium of interatomic potentials as used for materials properties Other articles deal with simulations of magnetic nanostructures improved Monte Carlo methods e g for nucleation studies in Ising models fluid dynamics with large mean free paths the growing field of sociophysics and teaching of undergraduate computational physics including an introduction to Java

Object-Oriented Analysis, Design and Implementation Brahma Dathan,Sarnath Ramnath,2025-02-08 This new edition demonstrates a modeling based approach to object oriented development It is a significant and comprehensive revision of the book While the central focus remains the same as in previous editions the reader will notice substantial improvements in the presentation Salient features All expected background materials are now in one chapter making it easier for both the teacher and the learner The treatment of modeling concepts and UML diagrams is both broader and deeper Securing the software is considered in the design and implementation phases The design is evaluated for bad smells which are corrected by refactoring Implementation is carried out in both JavaFX and Swing Software reuse is dealt with in much greater depth The role of substitutability is examined and explained in this context Comparison of the finite state machine and use case models is provided A procedure to assist readers in analysis and design using the finite state machine model is included

Critical Information Infrastructures Maitland Hyslop,2007-09-05 Resilience is an increasingly important concept and quality in today s world It is particularly important in the area of Critical Infrastructures It is crucial in the area of Critical Information Infrastructure This is because since the year 2000 man has been dependent on information and telecommunications systems for survival particularly in the Organization for Economic Cooperation and Development OECD countries and because all other Critical Inf structures depend upon to a greater or lesser extent Critical Information 1 2 Infrastructure Until probably the late 1980s it would be fair to say that the defense of individual nation states depended upon a mixture of political will and armed might The fall of

the Berlin Wall may have effectively ended the Cold War and with it a bipolar world but it brought globalization and a multipolar digital world in its wake Simply put a number of power vacuums were created and these have yet to be fully filled and settled In this New World many changes were afoot These changes include the increasing irrelevance of nation states in federated structures and the export of democracy on the back of globalization One of the biggest changes though is the use of digital technology by the OECD countries This is on such a scale that these countries have become both dependent upon information technology and as individual states largely irrelevant to the new global electronic economy 1 This adaptation of Maslow's hierarchy of needs is attributed to KPMG

Dictionary of XML Technologies and the Semantic Web Vladimir Geroimenko, 2012-12-06 The emerging Second Generation Web is based entirely on XML and related technologies It is intended to result in the creation of the Semantic Web on which computers will be able to deal with the meaning semantics of Web data and hence to process them in a more effective and autonomous way This new version of the Web introduces a multitude of novel concepts terms and acronyms Purpose Scope and Methods This dictionary is an effort to specify the terminological basis of emerging XML and Semantic Web technologies The ultimate goal of this dictionary is even broader than just to define the meaning of new words it aims to develop a proper understanding of these leading edge technologies To achieve this comprehensible definitions of technical terms are supported by numerous diagrams and code snippets clearly annotated and explained The main areas covered in this dictionary are 1 XML syntax and core technologies such as Namespaces Infoset and XML Schema 2 all the major members of the XML family of technologies such as XSLT XPath and XLink 3 numerous XML based domain specific languages such as NewsML News Markup Language 4 the concept and architecture of the Semantic Web 5 key Semantic Web technologies such as RDF Resource Description Framework RDF Schema and OWL Web Ontology Language and 6 Web services including WSDL Web Services Description Language and SOAP Simple Object Access Protocol
